

Publications of the Commercial Intelligence Department, India.

[Publications noted below are obtainable from the Superintendent, Government Printing, India, 8, Hastings Street, Calcutta, and all agents for the sale of Government publications. Remittances should be made by postal or money order and should include forwarding charges, as indicated in brackets opposite each publication.]

WEEKLY.

1. Indian Trade Journal—Yearly subscription in India. R13. Foreign R18. Post free.
Single copies (excluding postage):—Current issue As. 4; Back numbers R 1 each.

[Orders may be placed, with prepayment, for particular issues of the *Journal*, e.g., issues containing Crop Forecasts or those having Special Supplements.]

FORTNIGHTLY.

2. Wholesale and Retail Prices of certain staple Cereals, Pulses, Oilseeds, Sugar (raw), Salt, etc., in India. As. 6.

MONTHLY.

3. Accounts of the Foreign Sea-borne Trade and Navigation of British India. R1-4. (4a.)
4. Accounts relating to the Trade by Land of British India with foreign countries. As. 8. (2a.)
5. Cotton Spinning and Weaving in Indian Mills. As. 2. (1a.)
6. Customs Revenue Statement. Half anna.
7. Joint Stock Companies registered in British India and in the Indian States of Mysore, Baroda and Travancore. As. 3.

ANNUAL.

8. Review of the Trade of India. R1-10. (2a.)
9. Accounts relating to the Sea-borne Trade of British India for the Calendar year. R 1-2. (2a.)
10. Annual Statement of the Foreign Sea-borne Trade and Navigation of British India—
Vol. I.—Abstract and detailed Tables of Imports and Exports. R8. (R1-5.)
Vol. II.—Abstract and detailed tables of trade and shipping with each country and at each port, and tables relating to the trade of Aden and of the French Possessions in India. R6-12. (12a.)
11. Prices and Wages in India. R2. (9a.)
12. Statistical Abstract for British India. R6-8. (14a.)
13. Agricultural Statistics of India—
Vol. I.—British India. R2-8. (12a.)
Vol. II.—Indian States. R1-8. (4a.)
14. Summary Tables of the Agricultural Statistics of British India. As. 4.
15. Estimates of Area and Yield of Principal Crops in India. As. 8. (2a.)
16. Report on the production of Tea in India. (Supplement to the *Indian Trade Journal*.)
17. Report on the production and consumption of Coal in India. (Supplement to the *Indian Trade Journal*.)
18. Statement relating to Area, Production, Stocks, Exports and Imports of Rubber in India. (Supplement to the *Indian Trade Journal*.)
19. Statement relating to Area, Production, Import and Export of Coffee in India. (Supplement to the *Indian Trade Journal*.)
20. Statistics relating to Joint Stock Companies in British India and in the Indian States of Mysore, Baroda, Gwalior, Indore and Travancore. R6-8. (9a.)
21. Statistical Tables relating to Banks in India. As. 8. (1a. 6p.)
22. Statement showing progress of the Co operative Movement in India. As. 10.
23. Tariff Schedules—Reprint of Schedules II and III of the Indian Tariff Act, VIII of 1894 (as subsequently amended), showing the rates of Customs duties levied on goods imported into, and exported from British India. As. 6. (1a.)

MISCELLANEOUS.

24. Index Numbers of Indian Prices from 1861—1918 with addenda for 1919, 1920, 1921 and 1922. As. 13. (3a.)
25. Crop Forecasts. (Published in the *Indian Trade Journal*.)
Rice—1st (October), 2nd (December), Final (February).
Wheat—1st (January), 2nd (March), 3rd (April), 4th (May), Final (August).
Cotton—1st (August), 2nd (October), 3rd (December), Final (February), Supplementary (April).
Linseed, Rape and Mustard (*winter oilseeds*)—1st (January), 2nd (March), Final (June).
Sesamum (*til or jingili*)—1st (September), 2nd (October), Final (January), Supplementary (April).
Groundnut—1st (October), Final (February).
Indigo—1st (October), Final (December).
Sugarcane—1st (August), 2nd (October), Final (February).
26. Large Industrial Establishments in India. R1.
27. Registration and Publication of Statistics relating to the Sea-borne Trade and Navigation of British India. R3-2.
28. A Manual on the preparation of Crop Forecasts in India. As. 8.
29. Cotton Map of India, No. 1—Showing the different varieties of cotton grown in the different districts and States in India. R1.
30. Crop Atlas of India. R6-8.
31. Quinquennial Report on the Average Yield per Acre of principal Crops in India for the period ending 1916-17. As. 12.
32. Report on the First Census of Live-Stock, Ploughs and Carts in India, held between December 1919 and April 1920. As. 4.
33. A Classified List of Commodities that enter into the Land Frontier Trade of British India. R1-2.

RAJASTHAN UNIVERSITY LIBRARY

DATE LABEL . AC3

Call No. 75.0 71.1

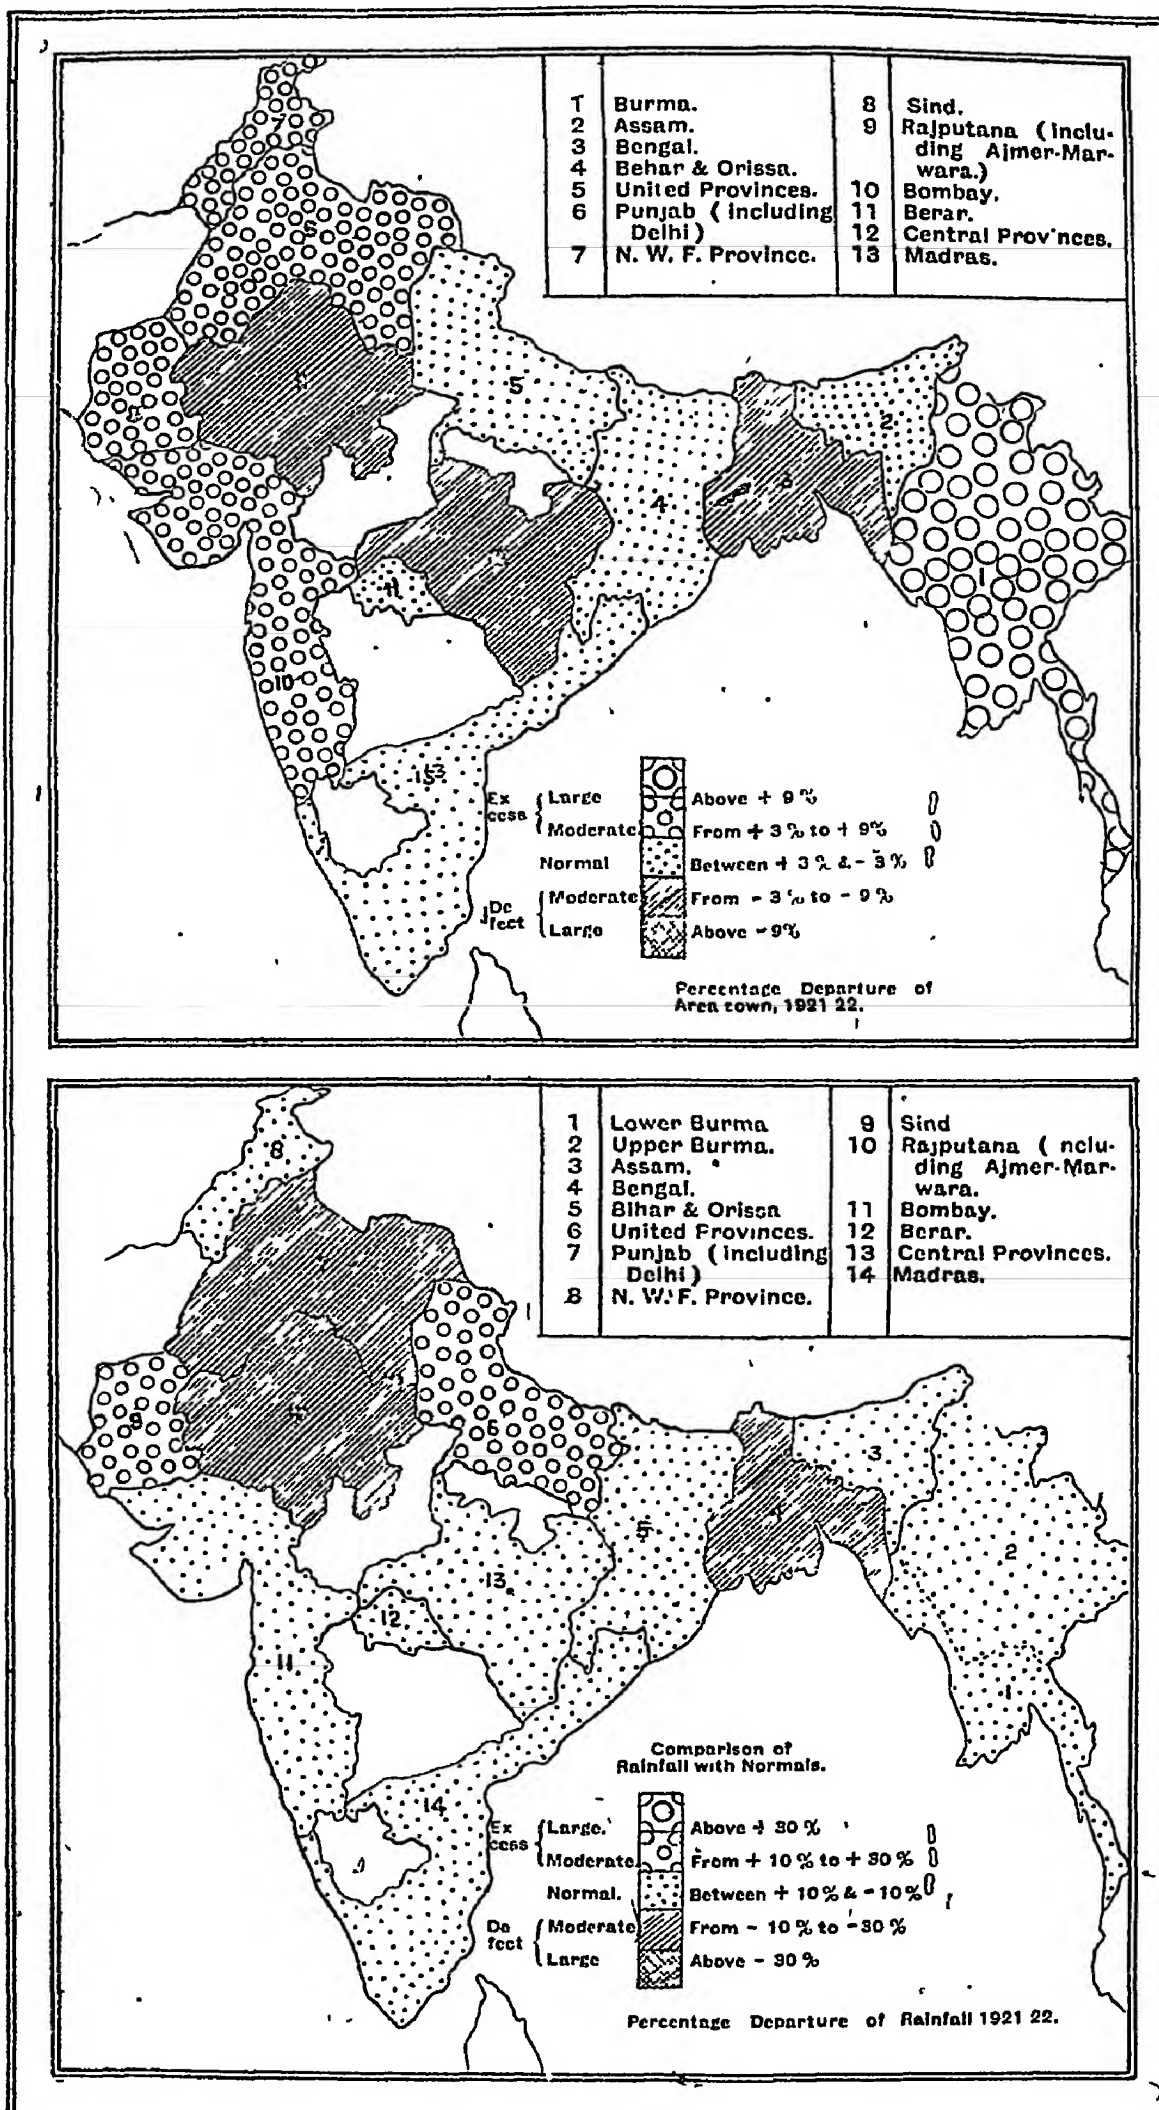

Accn. No. 80331

*Date of Release
for loan*

This book should be returned to the library on or before the date last stamped below.

A blank ledger page with a grid of columns and rows. The grid is defined by solid lines, with a double vertical line on the left side. The page is divided into several columns of varying widths and rows of varying heights. The top row is the widest, followed by a row of four columns. Below this is a row of three columns, followed by a row of four columns. The bottom row is the widest, followed by a row of four columns. The page is otherwise blank, with no text or markings.

Map showing the Departure of sown area and that of Rainfall in 1921-22.

FOOTNOTE.—For the actual figures of rainfall reference may be made to the publication entitled "Rainfall of India" issued by the Meteorological Department.

CONTENTS

	PAGES.
INTRODUCTORY NOTE	i—ix
(1) Map of India showing the departure of area sown and that of rainfall in 1921-22 from the average of the preceding ten years	Frontispiece
CHARTS illustrating—	
(2) Total area sown, area under food crops, current fallows (reversed), and variations in rainfall as compared with normal	xi
(3) Total wheat area, unirrigated wheat area, and rainfall in wheat-growing tracts (June to February)	
(4) Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows	
(5) Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops	
(6) Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops	
(7) Total area sown and area under different crops	
(8) Total live-stock divided between bovine, ovine, and others	
(9) Shares of provinces in the total area under principal crops	
(10) Harvest prices of some of the principal crops	

SUMMARY TABLES

No.		
1.	General summary, 1902-03 to 1921-22	2—3
2.	Area cultivated and uncultivated	4
3.	Area under irrigation	5
4.	Area under different crops cultivated	6—7
5.	Number of live-stock, ploughs, and carts	8—9
6.	Area assessed and incidence of the land revenue assessment on area and population	10—11
7.	Harvest prices	12
8.	Comparative statement showing acreage under certain crops in various countries of the World	13

GENERAL TABLES

I.—Area in each province during 1912-13 to 1921-22	14—17
II.—Classification of Area in each province during 1912-13 to 1921-22	18—21
III.—Area under Irrigation in each province during 1912-13 to 1921-22	22—29
IV.—Area under crops and specification of crops in each province during 1912-13 to 1921-22	30—41
V.—Live-stock, ploughs, and carts	42—45
VI.—Incidence of the land revenue assessment on area and population	46—57
VII.—Harvest prices in each province during 1916-17 to 1921-22	58—61

Agricultural Statistics of India

1921-22

VOLUME I—BRITISH INDIA

Introductory Note

This annual volume is the thirty-eighth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1 and for ten years in the provincial tables. The district tables have been omitted from the present issue with a view to effect economy and to make the volume more handy and useful. A map showing the departure from the normal of sown area and that of rainfall in 1921-22 and other charts as detailed in the last paragraph of this note have, as usual, been incorporated in the volume. A new Appendix (Appendix B) explaining provincial figures in each table, which were formerly shown as foot notes to district tables, has been added to the volume in the present issue.

The statistics are compiled from annual returns furnished by local authorities, namely, the Government of Bengal, of Bombay, and of Assam, the Chief Commissioner, Coorg, the Revenue Commissioner, North-West Frontier Province, the Commissioner, Ajmer-Merwara, the Commissioner of Settlements and Land Records, Burma, the Directors of Agriculture, Madras and Bihar and Orissa, the Directors of Land Records, the Central Provinces, the Punjab, and the United Provinces, the Deputy Commissioner, Delhi, and the Political Agent in the Southern States of Central India, Manipur. The statistics are given in seven separate tables, namely, I—Area; II—Classification of area; III—Area under irrigation; IV—Area under crops; V—Live-stock, ploughs, and carts; VI—Land Revenue assessment; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are four appendices, namely, Appendix A dealing with the average yields per acre of principal crops in each province*; Appendix B containing explanatory notes which are essential for the understanding of the different tables for the different provinces; Appendix C giving the meaning of vernacular terms used in the volume; and Appendix D containing an alphabetical list of crops cultivated in India and their classification in Table IV. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States† as far as they are reported.

The year to which the returns relate ends on 30th June, this being the generally recognised agricultural year, except in Assam where the year is taken to end on 31st March and in the Central Provinces and Berar where it is taken as ending on 31st May. It should, however, be borne in mind that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* and the *rabi* crops, and therefore actually relate to the year ended with the harvesting of the *rabi* or spring crops.

* These together with district figures are separately published in the blue book entitled 'Quinquennial Report on the average yield per acre of principal crops in India, 1921-22.'

† In Appendix A (Volume I), however, figures relating to the Mysore State are shown separately.

Total area and population of India

The total area of India is 1,813,000* square miles, or 1,160,172,000 acres, with a population of 319 millions according to the census of 1921. This may be divided as follows :—

	Acres	Population
(1) British Provinces (including Indian States within the political jurisdiction of Local Governments and Administrations)†	793,086,000	272,469,000
(2) Indian States having direct political relations with the Government of India	316,141,000	43,386,000
(3) Certain specially administered territories in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	16,239,000	2,583,000
(4) British Baluchistan (including administered areas)	34,706,000	421,000
Total	1,160,172,000	318,859,000

No returns of agricultural statistics are prepared either for item (3) certain specially administered territories in the North-West Frontier Province, or for item (4) British Baluchistan.

Table I
Total area

The total area of the British Provinces (item 1 above) dealt with in this volume—793,086,000 acres or 1,239,000 square miles—includes 126,467,000 acres, with a population of some 26 millions, belonging to Indian States,† which are within the political jurisdiction of Local Governments and Administrations. These States comprise Manipur and the Khasi and Jaintia Hill States in Assam; Oooch Bihar and Tripura in Bengal; the Tributary States of Orissa and Chota Nagpur in Bihar and Orissa; Rampur, Tehri, and Benares in the United Provinces; the Punjab Agency States‡, the Ambala Division States, and the Simla Hill States in the Punjab; the Phulera and Upper Tanawal States in the North-West Frontier Province; the Khairpur State§ in Sind; the Gujarat States (excluding Baroda), the Konkan States, the Deccan States, the Satara Jagirs, and the Southern Mahratta States in Bombay; the Chhattisgarh States in the Central Provinces; and the States¶ of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur in Madras. Of these States, agricultural statistics are prepared for most of the States in the Punjab and the United Provinces, all the States in Madras and a few States in Bombay; but they are dealt with in Volume II along with the States having direct political relations with the Government of India (item 2).

Thus, by deducting 126,467,000 acres belonging to Indian States from the total area of 793,086,000 acres included in British Provinces, the remainder, 666,619,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers," i.e., papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 663,508,000 acres, as against 666,619,000 acres according to the professional survey.

*The difference between this area and that shown in the Census report of 1921 is due mainly to the exclusion of certain tracts of Burma especially Putao, from the Census return. A considerable part of Putao amounting to over 6 million acres is excluded from the Census report.

†Some of these States have since come under direct political relationship with the Government of India (item 2).

‡These States have recently come under direct political relationship with the Government of India.

This area is, for the purpose of Agricultural Statistics, classified as Table II
shown in the margin. About Classification of
area

	Acres (1,000)	Per cent
Forests	85,419	12.9
Not available for cultivation	153,178	23.1
Culturable waste other than fallow	151,173	22.8
Current fallows	50,554	7.6
Net area sown	223,184	33.6
Total	663,508	100

ings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 153,178,000 acres or 23 per cent. The balance, 424,011,000 acres or 64 per cent, represents the area available for cultivation. Of this, 151,173,000 acres, or 23 per cent of the total area, represent culturable waste other than fallow, i.e., land available for cultivation but not taken up, and 50,554,000 acres, or over 7 per cent, were kept fallow in the year of report. The net area actually sown with crops during 1921-22 was therefore 223,184,000 acres,

	Proportion of sown to total area	Population per 100 acres of sown area
Delhi	60 per cent	222
Bombay	55 "	55
United Provinces	52 "	127
Bihar and Orissa	48 "	131
Bengal	47 "	188
Punjab	42 "	80
Central Provinces and Berar	37 "	59
Madras	36 "	125
North-West Frontier Province	29 "	97
Manipur	23 "	71
Assam	18 "	131
Ajmer-Merwara	17 "	167
Coorg	14 "	125
Sind	13 "	81
Burma	10 "	83
British India	33 "	109

or nearly 34 per cent of the total area, as against 212,259,000 acres in the preceding year, or an increase of 5 per cent. The proportion of sown to total area and the number of population per 100 acres of sown area in each province are stated in the margin. The proportion of sown to total area in the year under review was highest in Delhi and lowest in Burma. This area, however, excludes areas sown more than once in

the year. If areas sown more than once are taken as separate areas for each crop, the gross area sown in the year of report amounts to 256,582,000 acres, as against 239,201,000 acres in the preceding year.

The term "forests" in the returns of Agricultural Statistics means Forests
"any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded from that head and entered in the column "net area sown." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the Administration of the Forest Department for various reasons,* the chief amongst which are the following:—(1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (3) certain village and other lands not covered by forests but worked by the Forest Department and returned as forest lands by that Department, are not treated as forests in the returns of Agricultural Statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (85,419,000 acres in 1921-22), 23 per cent lies in Burma, 19 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in the Bombay Presidency, and the remaining 22 per cent in the other provinces.

Most of the barren and unculturable lands lies naturally in the hilly Area not available
for cultivation
tracts of Burma and of southern India and in the dry and deserty regions of north-western India. Burma contains 36 per cent of the total area "not available for cultivation" (153,178,000 acres in 1921-22), the Madras Presidency 14 per cent, Sind 9 per cent, and the Punjab 8 per cent.

The head "culturable waste other than fallow" shows lands available for Culturable waste
other than fallow
cultivation but not yet taken up. It includes areas such as groves not classed in the area sown and also areas under bamboos and thatching grass when not

* For detailed explanations in respect of provinces, see notes in Appendix B (Table II).

forming parts of forest areas.* Of the total culturable waste land (151,173,000 acres in 1921-22), 40 per cent is in Burma, 11 per cent in the Punjab, 10 per cent in the Central Provinces and Berar, 9 per cent in Assam, 8 per cent in the Madras Presidency, and the remaining 22 per cent in the other provinces.

Current fallows

The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste." Owing to this diversity of practice, the classification of area as "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1921-22 was 50,554,000 acres, as against 61,347,000 acres in the preceding year, or a decrease of 18 per cent.

Table III
Irrigation

	Proportion of irrigated to total sown area	
Sind	74 per cent	where the rainfall is ordinarily heavy,
Punjab	51 "	the crops hardly need the help of
North-West Frontier Province	40 "	irrigation, unless there is an unusual
Ajmer-Merwara	40 "	scarcity of rain. Of the total area
Madras	29 "	irrigated in 1921-22, the Punjab accounted
United Provinces	28 "	for 28 per cent, the United Provinces
Bihar and Orissa	22 "	21 per cent, the Madras Presidency
Delhi	19 "	20 per cent, Bihar and Orissa 11 per
Burma	8 "	cent, Sind 6 per cent, and the other pro-
Bengal	7 "	vinces the remaining 14 per cent. The
Central Provinces and Berar	5 "	proportion of irrigated to total area sown
Bombay	4 "	in each province is stated in the margin.
Assam	4 "	The proportion is, as usual, highest in the
Coorg	3 "	driest province of Sind.

The figures of irrigated areas do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 50,989,000 acres in 1921-22. Of this area about 87 per cent was under food crops and the remainder under non-food crops. Of the former 17,922,000 acres were sown under rice, 9,755,000 acres under wheat, 2,809,000 acres under barley, 1,531,000 acres under jowar, 1,425,000 acres under bajra, 1,001,000 acres under maize, 1,618,000 acres under sugarcane, and the remaining 8,185,000 acres under other food crops. Of the irrigated non-food crop area 1,568,000 acres were occupied by cotton. These statistics of irrigated crops are in some cases defective as explained in the notes in Appendix B and at the foot of Table III (pages 22-20).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are made on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements,

* For detailed explanations in respect of provinces, see notes in Appendix B (Table II).

is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains, and in this case the whole area of the mixed field is assigned to food-grains.

The gross area cultivated with crops covered, as stated above, nearly 257 million acres in 1921-22. The different classes of crops and the area occupied by each class are stated in the margin. Of the total sown area, food-crops occupied

	Acres (1,000)	Per cent of total
Food-grains	204,791	80.0
Condiments and spices	1,412	0.5
Sugar	2,522	1.0
Fruits and vegetables	5,588	2.1
Miscellaneous food-crops	1,245	0.5
Total food-crops	215,508	84.1
Oilseeds	14,197	5.5
Fibres	13,854	5.4
Dyes and Tanning materials	854	0.3
Drugs and narcotics	2,247	0.9
Fodder crops	8,608	3.4
Miscellaneous non-food crops	971	0.4
Total non-food crops	40,731	15.9

about 215,508,000 acres or 84 per cent and non-food crops about 40,731,000 acres or 16 per cent. Of the food-crops, food-grains (cereals and pulses) covered as much as 204,791,000 acres†, or about 80 per cent of the total area sown, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) some 10,717,000 acres or

only 4 per cent of the total. Of non-food crops, fibres such as cotton, jute, hemp, etc., occupied 13,854,000 acres or 5 per cent of the total area sown, and oilseeds 14,197,000 acres ‡ or 6 per cent. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied some 12,680,000 acres or 5 per cent of the total.

The area under food-grains (204,791,000 acres) showed an increase of 17,901,000 acres or 10 per cent as compared with the preceding year. The actual

	1921-22	1920-21	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Rice	79,700	78,120	+ 1,580
Wheat	22,401	20,368	+ 2,033
Barley	7,356	6,268	+ 1,088
Jowar	21,214	22,600	+ 1,386
Bajra	15,901	13,002	+ 2,899
Ragi	4,211	4,230	—19
Maize	6,335	6,206	+ 129
Grain	15,055	9,464	+ 5,591
Other grains and pulses	29,615	27,533	+ 2,082

increase or decrease under each kind of grain is stated in the marginal table. It will be seen that all the crops except ragi showed increases. Of the total area shown in the table under food-grains, 19 per cent was in the United Provinces†, 15 per cent in the Madras Presidency, 13 per cent in Bihar and Orissa, 11 per cent

each in Bengal and the Punjab, 10 per cent in the Bombay Presidency, 7 per cent in the Central Provinces, and the remaining 14 per cent in the other provinces.

The area under oilseeds (14,197,000 acres) showed an increase of 1,827,000 acres or nearly 15 per cent as compared with the preceding year. The actual

	1921-22	1920-21	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Linseed	2,054	1,496	+ 558
Sesamum	3,707	3,592	+ 115
Rape and mustard	4,233	2,979	+ 1,254
Other oilseeds	4,203	4,303	—100

increase or decrease under each kind of oilseeds is stated in the margin. Of the total area under oilseeds shown in this table, 24 per cent was in the Madras Presidency, 14 per cent each in Bihar and Orissa and the Central Provinces

and Berar, 12 per cent in the Punjab, 10 per cent in Burma, 9 per cent in Bengal, 6 per cent in the Bombay Presidency, 5 per cent in the United Provinces,‡ and the remaining 6 per cent in the other minor provinces.

* For a list of these crops, vide Appendix D.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated to have been 4,000,000 acres in the whole province in 1921-22. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1921-22 would come to 201 million acres instead of 205 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces of Agra and Oudh represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1921-22 for the whole of the United Provinces to about 4 million acres. Including this area, the total area under oilseeds in British India in 1921-22 would come to nearly 18 million acres.

Condiments and
spices

The total area under condiments and spices in 1921-22 was 1,412,000 acres as against 1,334,000 acres in the preceding year, or an increase of 78,000 acres or 6 per cent. Spices are grown mostly in the southern parts of India, the Madras Presidency alone accounting for about 50 per cent. of the total area under condiments and spices in 1921-22.

Sugar

The total area occupied by sugar yielding plants in 1921-22 was 2,522,000 acres, as against 2,706,000 acres in the preceding year, or a decrease of 184,000 acres or 7 per cent. Of this area, 2,363,000 acres were under sugarcane, as against 2,541,000 acres in the preceding year. Of the sugarcane area 49 per cent was in the United Provinces, 16 per cent in the Punjab, 13 per cent in Bihar and Orissa, 9 per cent in Bengal, and 5 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 159,000 acres as against 165,000 acres in the preceding year. Of this area the Madras Presidency accounted for 48 per cent and Bengal 35 per cent.

Fibres

Fibre crops occupied 13,854,000 acres in 1921-22, as against 17,316,000 acres in the preceding year, or a decrease of 3,462,000 acres. The actual decrease under the several kinds of fibres is shown in the marginal table.

	1921-22 Acres (1,000)	1920-21 Acres (1,000)	Decrease (—) Acres (1,000)
Cotton	11,665	14,111	—2,446
Jute	1,506	2,173	—667
Other fibres	683	729	—46

The area under cotton showed a decrease of 17 per cent. Of the total cotton area, 38 per cent was in the Central Provinces and Berar, 24 per cent in the Bombay Presidency, 15 per cent in the Madras

Presidency, 10 per cent in the Punjab, and 7 per cent in the United Provinces. The area under jute showed a decrease of 30 per cent. Of the total jute area 87 per cent was in Bengal and the remaining 13 per cent in the adjoining provinces of Bihar and Orissa and Assam. Other fibres also showed a decrease of 6 per cent as compared with the preceding year.

Dyes and Tanning
materials

The total area under dyes and tanning materials was 551,000 acres in 1921-22. Of this, the area under indigo was 329,000 acres, showing an increase of 88,000 acres or 37 per cent. Of the total indigo area, 60 per cent was in the Madras Presidency, 14 per cent in the United Provinces, 12 per cent in Bihar and Orissa, and 10 per cent in the Punjab. Other dyes and tanning materials covered an aggregate area of 525,000 acres.

Drugs and narcotics

Drugs and narcotics occupied 2,217,000 acres in 1921-22, as against 2,030,000 acres in the preceding year, or an increase of 208,000 acres. The actual increase or decrease under each kind of drugs and narcotics is stated in the marginal table.

	1921-22 Acres (1,000)	1920-21 Acres (1,000)	Increase (+) or decrease (—) Acres (1,000)
Opium	123	121	+2
Coffee	97	96	+1
Ten	713	661	+52
Tobacco	1,051	932	+119
Other drugs and narcotics	263	226	+37

Fodder crops

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1921-22 was 8,608,000 acres, as against 8,108,000 acres in the preceding year.

Fruits and vegetables
including root crops

The total area under fruits and vegetable crops in 1921-22 was 5,538,000 acres, as against 5,172,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see Appendix D.]

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,216,000 acres. Of this, about 1,245,000 acres were occupied by miscellaneous food-crops and about 971,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on pages 30 to 37 and Appendix D.]

Area sown more than
once

The total extent of land on which more than one crop was cultivated during the year was 33,399,000 acres, as against 26,942,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in certain provinces and quinquennially in others. The first general quinquennial census was taken, in 1919-20. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels. The total number of live-stock of each of these three classes in each province,

Table V
Live-stock, ploughs
and carts

	Bovine	Number in thousands			Carts
		Ovine	Others	Ploughs	
Bengal	24,724	4,396	136	4,448	787
Madras	22,291	18,515	181	4,267	1,037
Bombay	8,181	2,890	205	1,093	625
Sind	1,818	1,692	300	264	57
United Provinces	29,764	0,100	704	4,872	841
Bihar and Orissa	19,853	4,139	198	3,051	494
Punjab	14,409	7,086	1,265	2,214	302
Burma	5,770	345	91	685	679
Central Provinces and Berar	10,957	1,212	162	1,381	902
Assam	5,472	797	20	912	48
North-West Frontier Province	1,132	834	200	213	10
Ajmer-Merwara	336	415	12	40	12
Delhi	136	30	10	17	6
Coorg	145	3	1	31	1
Manpur	6	1	...	1	...
Total	145,000	46,115	3,538	23,572	5,751

together with the numbers of ploughs and carts, is stated in the margin. Of the total number of live-stock of the bovine class (145 millions), which is cattle proper, the United Provinces accounted for 20 per cent, Bengal 17, Madras 15, Bihar and Orissa 14, the Punjab 10, the Central Provinces and Berar 8, Bombay including Sind 7, and the remaining provinces 9 per cent. In the case of stock of the ovine class (sheep and goats), however, Madras

accounted for 36 per cent of the total, followed by the Punjab (15 per cent), the United Provinces (13 per cent), Bombay including Sind (10 per cent), and Bengal and Bihar and Orissa (9 per cent each). The table below shows the number of live-stock of the bovine class (cattle proper) per 100 acres of sown area and per 100 of the population of each province. It will be seen that the number of cattle per 100 acres of sown area ranges between 30 in Bombay and 113 in Ajmer-Merwara, while the number per 100 of population varies from 28 in Delhi to 120 in the Manpur Pargana. The average for British India, as a whole, is 65 per 100 acres of sown area and 60 per 100 of the population.

	Number of cattle			Number of cattle	
	Per 100 acres of sown area.	Per 100 of popula- tion.		Per 100 acres of sown area.	Per 100 of popula- tion.
Bengal	101	55	Central Provinces and Berar	46	79
Madras	67	54	Assam	96	73
Bombay	30	55	North-West Frontier Province	47	46
Sind	45	55	Ajmer-Merwara	113	68
United Provinces	83	66	Delhi	62	28
Bihar and Orissa	78	58	Coorg	101	83
Punjab	56	70	Manpur	86	120
Burma	36	44			

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure is known as *raiayatwari*. Under either system there may be rent-paying subtenants. *Zamindari* tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a limited number of years only. Village

Table VI
Land Revenue
Assessment

* In Burma, the Central Provinces and Berar, Ajmer-Merwara and Manpur Pargana the Census is taken annually; in all other provinces it is taken quinquennially.

communities and raiyatwari tenures are, as a rule, temporarily settled, and the land revenue assessed on them are changeable from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure, according to the latest statistics available, the figures roughly indicating the extent to which the different systems prevail :—

	Raiyatwari	Zamindari (individual proprietors or village communities) settled		Total
		Permanently	Temporarily	
	Acres (1,000)	Acres (1,000)	Acres (1,000)	Acres (1,000)
Bengal	39,303	11,152	50,455
Madras	61,462	29,586	...	91,048
Bombay	44,804	...	3,912	48,716
Sind	30,142	30,142
United Provinces	7,482	60,391	67,823
Bihar and Orissa	41,889	11,223	53,112
Punjab	56,320	56,320
Burma	152,929	152,929
Central Provinces	12,363*	...	40,437	52,800
Berar	11,375*	11,375
Assam	25,768	3,991	1,819	31,518
North-West Frontier Province	8,438	8,438
Ajmer-Merwara	974	797	1,771
Delhi	368	368
Coorg	1,012	1,012
Manpur	31	31
Total	339,886	123,115	191,857	657,858

It will thus be seen that about 52 per cent of the total area is held by *raiyyatwari* proprietors, while 19 per cent is held by permanently settled and 29 per cent by temporarily settled *zamindari* proprietors.

The statistics for this table are collected annually in Burma, Assam, Manpur, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Ajmer-Merwara, Bombay, Sind, Madras, and Coorg. According to the latest statistics available, the total revenue from land (excluding cesses) for the whole of British India amounts to Rs 36 crores. This represents the actual realisable demand† on account of the year, no account being taken either of the collection of arrears for past years, or of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province. For additional details reference should be made to Table No. 14 on pages 46-57.

	Total revenue from land (Rs 1,000)	Total population (1,000)	Revenue per head R a.
Bengal	2,93,56	44,538	— 11
Madras	6,80,57	41,406	1 10
Bombay	3,45,61	14,837	2 5
Sind	92,74	3,279	2 13
United Provinces	6,99,56	45,476	1 9
Bihar and Orissa	1,56,60	34,602	— 7
Punjab	4,10,48	20,691	2 6
Burma	5,37,14	13,213	4 1
Central Provinces	1,24,68	10,573	1 2
Berar	88 11	3,687	2 11
Assam	95,81	7,462	1 5
North-West Frontier Province	26,86	2,339	1 2

Total	36,42,31	242,295	1 8

Table VII
Harvest prices

Table VII shows prices of staple crops at harvest-time. It will be seen from this table that the average prices of rice (unhusked), cumbu or bajra,

* Including Government forests

† Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

maize, cotton (cleaned), jute, linseed and groundnut were higher than in the previous year, while those of winter rice, wheat, barley, cholam or jowar, gram, sugar (raw), rape and mustard, sesamum, and tobacco were lower.

The Agricultural Department in each province maintains a statement of the average yield, per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and, if necessary, to revise these, a system of crop-cutting experiments exists in all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the Provincial Agricultural Department. The results of the experiments are reported to the head of the Provincial Agricultural Department, who revises the standards in the light of these returns, local enquiries and personal knowledge. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments made up to 1921-22. The district figures are shown in the blue book styled *Quinquennial Report on the average yield per acre of crops in India for the period ending 1921-22*.

Appendix B which is newly added contains all the important explanatory notes which appeared under district tables in the previous issues and which are essential for a thorough understanding of the different tables in the different provinces. Appendices C and D require little or no comment. Appendix C explains the vernacular terms used in this volume, and Appendix D the classification in Table IV of the various crops cultivated in India.

The map, charts, and diagrams exhibited in the volume illustrate—

- (1) the departure of sown area and that of rainfall in 1921-22 from the average of the preceding ten years ;
- (2) variations in rainfall as compared with the normal in relation to the total area sown, food-crops area, and current fallows (reversed) ;
- (3) the rainfall in wheat-growing tracts (June to February) as compared with the total and unirrigated wheat areas ;
- (4) total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows ;
- (5) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops ;
- (6) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops ;
- (7) total area sown and area under different crops ;
- (8) total live-stock divided between bovine, ovine, and others ;
- (9) shares of provinces in the total area under principal crops, and
- (10) harvest prices of certain principal crops.

D. N. GHOSH,

Director of Statistics

for Director-General of Commercial Intelligence.

COMMERCIAL INTELLIGENCE DEPARTMENT, INDIA

Calcutta, December 13, 1923.

2. Total area sown, area under food crops, current fallows (reversed) and the variations in rainfall, as compared with normal.

3. Total wheat area, unirrigated wheat area and rainfall in wheat-growing tracts (June to February).

NOTE.—The scale of the curves in Chart No. 3 for "total wheat area" and "unirrigated wheat area" has, in order to effect a better comparison, been made much larger than that used for the curve showing "rainfall."

4. Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow and current fallows.

NOTE.— 1. "Total cultivable area" represents the sum of net area sown, culturable waste, and current fallows.
 2. "Uncultivable area" includes the area under forest.

5. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

6. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

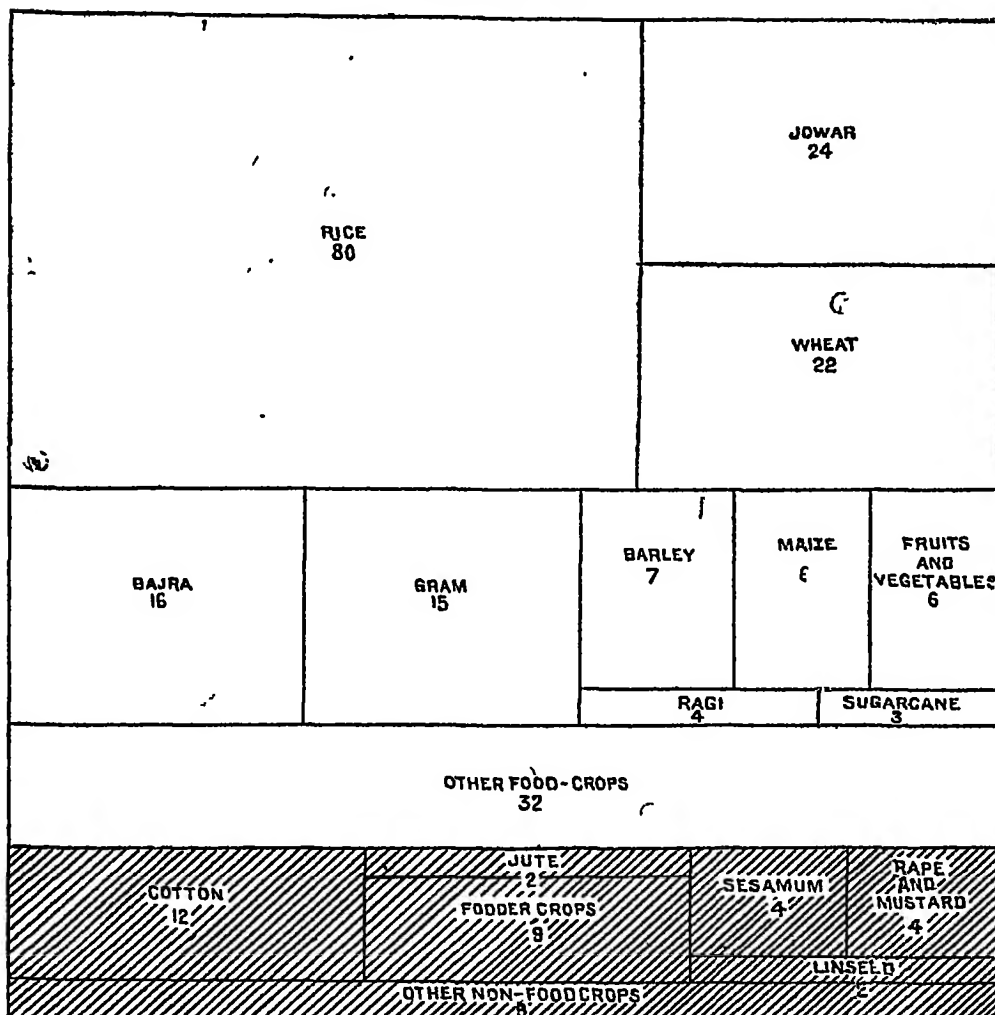

NOTE.—Millets represent jowar, bajra, and ragi.

7. Total area sown in 1921-22.

Total area sown	257 million acres
Area under food crops (unshaded)	216 " "
Area under non-food crops (shaded)	41 " "

(in Million acres.)

NOTE.—“Other food crops” are minor food-grains, condiments and spices, and miscellaneous food crops.
 “Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

8. Total livestock divided between bovine, ovine, and others in 1921-22, as compared with the year 1912-13.

1912-13

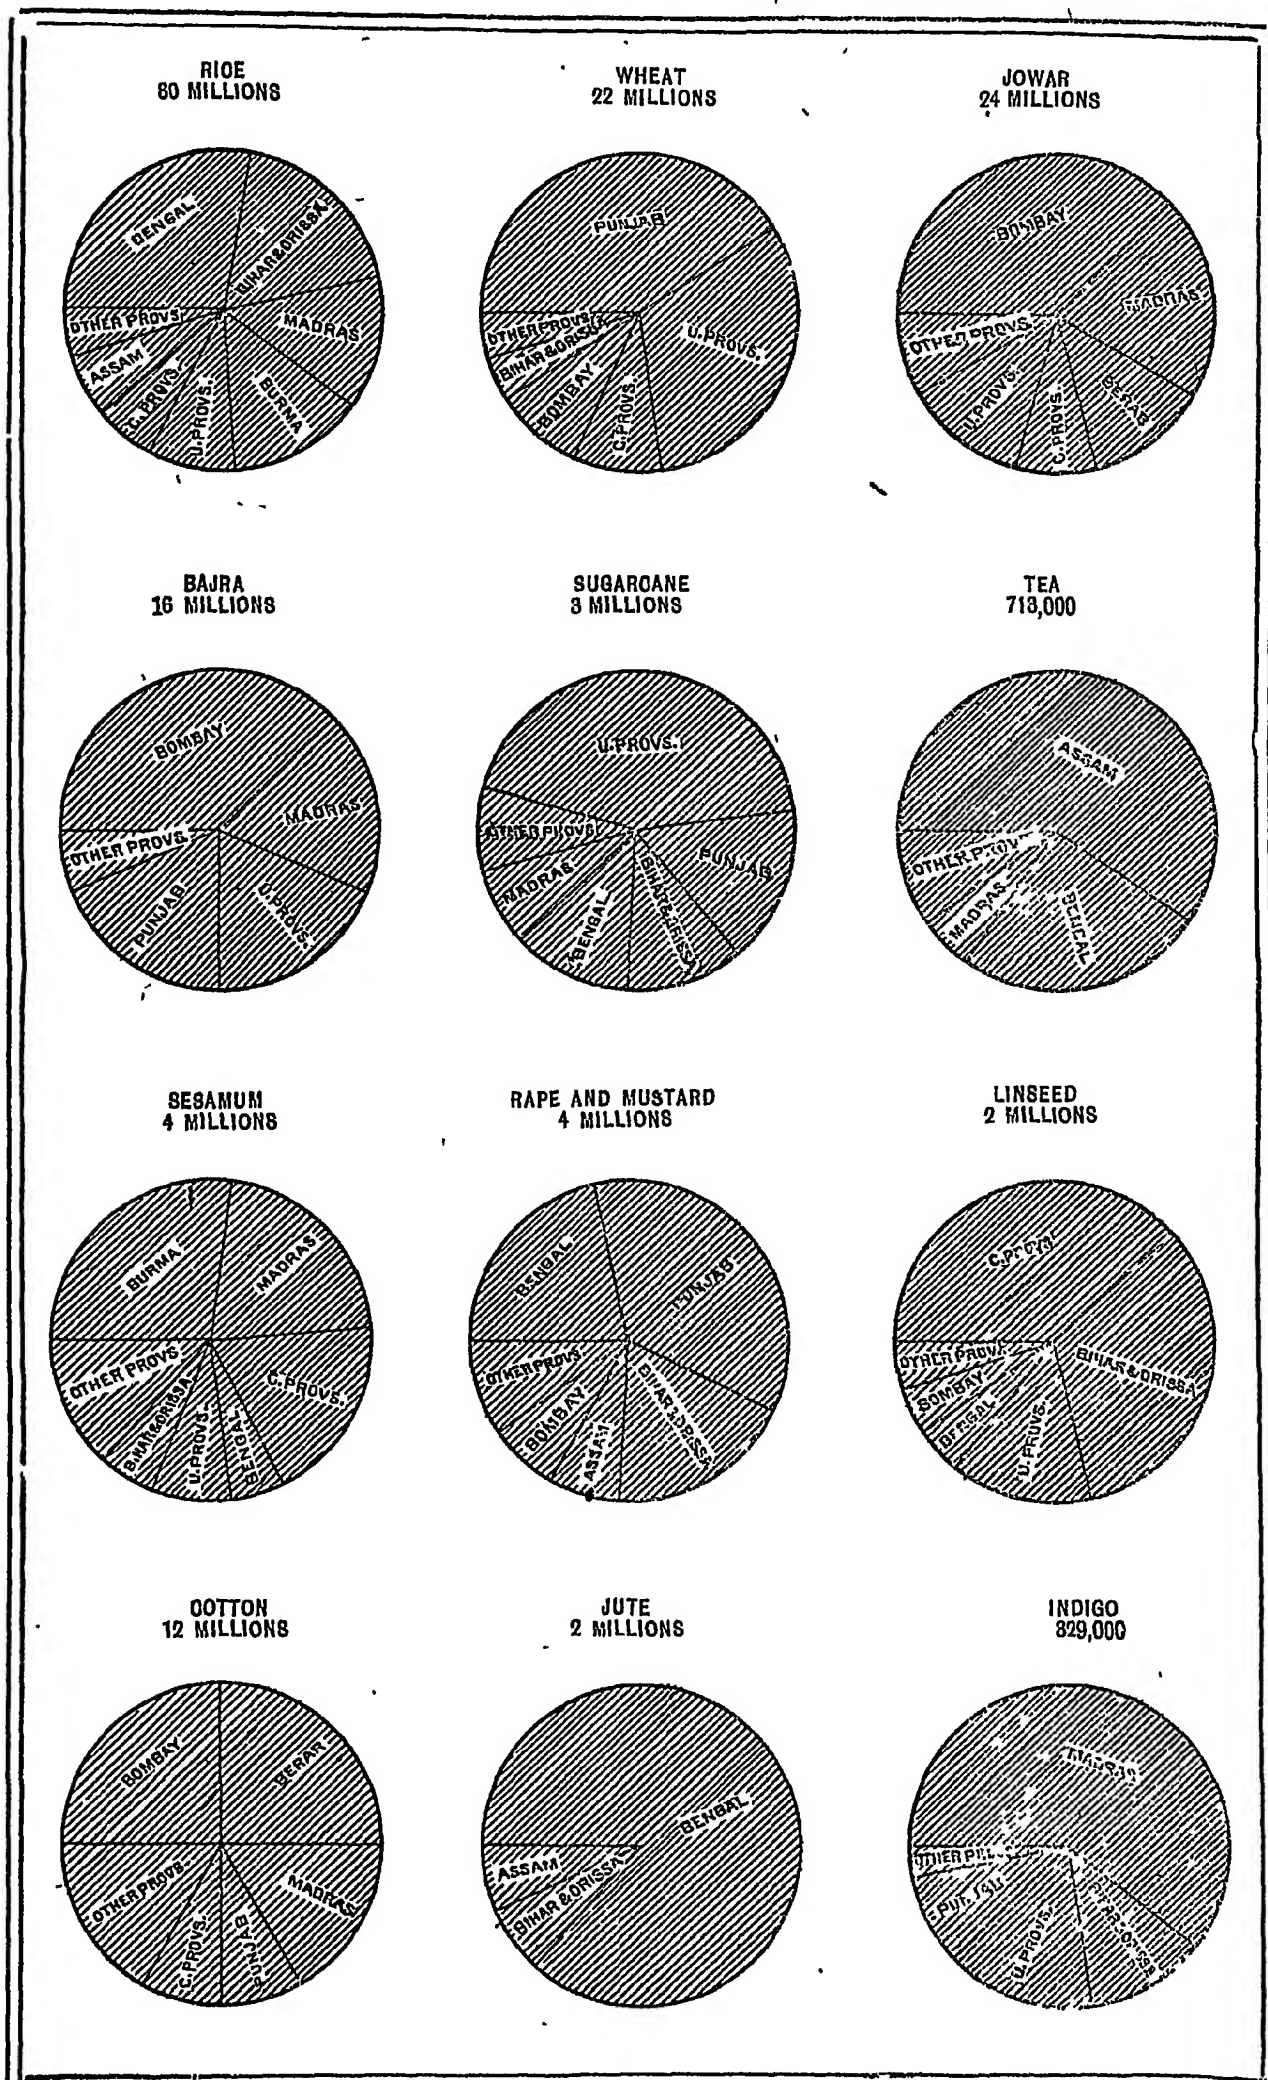

1921-22

NOTE.—“Bovine” includes bulls and bullocks, cows, buffaloes, calves, and buffalo calves.
 “Ovine” includes sheep and goats.
 “Others” include horses and ponies, mules, donkeys, and camels.

9. Shares of provinces in the total area (in acres) under principal crops in 1921-22.

NOTE.—In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

10. Harvest Prices (Rs. per maund) of Certain Principal Crops in India.

* Relates to rice-unhusked (Paddy)

* Miscellaneous revenue									
† Excludes 3,407,181 acres in the districts of Dinajpur, Rangpur, and Pabna, for which summary returns are not available									
(a) Figures not available									
Column 5.—Where the land revenue includes the Zamindar's share wholly realised during the year or not, is entered after adding the revenue from canals in the summary returns									

* Miscellaneous revenue
† Excludes 3,407,181 acres in the districts of Dinajpur, Rangpur, and Pabna, for which details are not available

Column 5.—Where the land revenue includes the Zamindar's share, the net demand is entered, and the table states the payment wholly realised during the year or not, is entered after excluding arrears for past years. Surplus remitted on account of unoccupied lands, short revenue from canals in Sind, fluctuating collections (including nazrana), over-collections (Bombay), surplus collections, collections from Government settlements; (6) moturpha (house tax) collections; (7) recoveries on account of Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of Land Registration Fees, receipts on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of Land Registration Fees, receipts (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of Revenue Courts (except in Bengal and Assam), receipts under mines (Burma), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C

Column 6.—The population is that of the last general census

* Miscellaneous revenue

(a) Figures not available

† Excludes Rs 16,18,959 in Dinajpur for which details are not available due by the Zamindars to Government, not those due by raiyats to the Zamindars. The actual realisable demand on account of the year whether crops, etc., are excluded in the case of those provinces where all remissions are granted within the year to which the return relates, but in includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, mort estates, kyan tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of survey and settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax Madras Act, XI of 1861, capitation tax (Burma), petroleum well revenue, jado and amber revenue, Thathameda tax (Burma), receipts from ruby land, and rents of buildings situated on such lands.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include States politically controlled by Local Governments, with the exception of the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 6; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 4 of Table II.

NOTE.—For detailed information, see notes in Appendix B.

See explanations given in footnotes (page 14)

(a) Differences due to revised figures being reported by the Survey Department.

(b) Differences due to the partition of the Ruby Mines district in 1920-21, a portion of which was transferred to the Shan States, and the whole area was treated as Indian States in that year.

(c) Include for the first time Ilkamti Long area, Putao, Southern Shan States and Kerennie.

(d) Areas which were shown in this column in previous years have been treated as British districts from 1921-22.

Column 2.—“Forests” mean “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

NOTE.—(1) The variations in the areas shown in different years under the same item in the same province do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

(2) For detailed information, see notes in Appendix B.

See explanations given in the footnotes (page 18)

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the Forest Administration Report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes unculturable Government waste and unculturable lands.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable lands, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of lands). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to the inclusion in column 19 of the area irrigated at both harvests.

(a) Included in column 14.

(b) Included in column 16.

(c) Included in column 18.

NOTE—(i) This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

(iii) For detailed information, see notes in Appendix B.

Column 10 (other food-grains including pulses).—Arhar (pigeon pea), barabati, lobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), field gram, cheik (job's tear), lentils, cheena (common millet), kangni (Italian millet), kodo or varagu, kutli (little millet), kuhudi, peas, pigeon or bottle grass, swank or shama, chickling vetch, buck wheat, wadalu or bati.

Column 30 (other dyes and tanning materials).—Arnatto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.

Column 33—in certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on tea production published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 37 (other drugs and narcotics).—Aloes, areca nut, sweet basil, betel-vine, country borage, bogoda brinjal or nela mulaka datura, purple flea-bane, isingul, kolinji or rempali, senna, soap nut, sweet flag.

Column 39 (*fadder crops*).—Carou or locust-tree, locust chickling, locust, white glass, cane, most of them.
 Column 40 (*fruits and vegetables including root crops*).—Agasi, wood apple, ashwau nut, custard apple, rose apple, artichoke, arum, beans, beetroot, bilimbi, bimb, lalajal, cabbage, carrol, cassava, cauliflower, celery, chitoy, citron, cress, cucurber, drumsticks or h'iro radish, elephantfoot, fig, garmal, cape gooseberry, country star gooseberry, goosefoot, gourd, gourd melon, grapes, guava, gambeyr, edible hibiscus, jack fruit, jujube, kanda, kankiol, kauranga, kulola, kavali, kavathu, koorka, lettuce, mango, min-gosteen, mankachu, manins, Indian melar, melo , oranges, papay, parvar or patol, peach, pineapple, plantain, black plum, hog plum, pomegranate, pomeio, ponnugantikara, potato, pulyavara, sweet potato, pumpkin, radish, raspberry, rosollo, sankulu, sapochila sebastan, sorrell, water oilroot, spinach, strawberry, manila tamarind, tomato, turnip, uchiho, yams, elephant yams.

Column 41 (miscellaneous food crops).—*Chrysanthemum, dani (nip fruticans), dhaincha (sesbania acutata), flowers, margosa or neem tree, mulberry, chaplash, tholke (grass).*

(c) Increase in 1915-16 is due to inclusion of area under grass and babul previously shown as "fallow" in Table 11.

(c) Includes 2 441 acres in North Arcot for which details of crops are not available.

(f) Includes 342.392 acres in Almora and Nainital for which details are not available.

(7) " 343,117 " " " " " " " " " "

(k) "349,216" "the sum of the preceding column"

NOTE.—The total in column 43 differs in some cases from the sum of the preceding columns.

NOTE.—The total in column 43 differs in some cases from the sum of the preceding columns (*vide* footnotes *b, d, e, f, g* and *h* above).

NOTE.—The total in column 43 differs in some cases from the sum of the preceding columns (*vide* footnotes *b, d, e, f, g* and *h* above).

Note.—(i) Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. Oxen, buffaloes, horses and ponies not old enough for work or to produce young are treated as "young stock."

(ii) For detailed information see notes in Appendix B.

(a) Figures not available

(b) Figures for 1910-11, which are based on estimates, include Bihar and Orissa but exclude Eastern Bengal

(c) Included under "Young stock (calves)"

(d) Includes bulls, cows, and young stock (calves) for the Northern Shan States

(e) Includes cow buffaloes and young stock (buffalo calves) for the Northern Shan States

(f) Revised in 1918-19.

(g) " " 1920-21.

(a) An annual census is taken on the 15th March in Munpur.

(b) The figures in columns 9 to 18 exclude Bengal.

(c) Statistics based on a census taken in 1913-14. Figures for columns 8, 17 and 18 were revised in 1911-15.

(d) Included under "Young stock (calves)".

(e) In Coorg a census is taken every five years. The last Census was taken in March 1920 by the circle shanbaga and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in Municipal Towns are included.

	1920-21	3,912,380	1,375,951	30,017	2,505,602	571,218

Note.—(1) The varieties of tenure are included as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. In the Central Provinces and Berar, however, areas under Government forests are shown separately.

(2) For detailed information see notes in Appendix B.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed." Areas should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net sown area as shown in column 6 of Table II.

(§) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* No details

† Includes 1,360,300 acres (in Dinajpur for which details are not available).

‡ There is due to inclusion of certain Zamindari villages which were formerly included under Raiyatwari.

(a) Excludes Bihar and Orissa districts constituted into a separate province.

(b) Includes 3,407,181 acres in Dinajpur, Rangpur, and Pabna, for which details are not available.

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, and not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazimann), over collections (Bombay), surplus collections, collections from Government estates, kyan tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement dues; (5) mohajira (house tax) collections; (6) assessment of alienated lands less rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, hucoba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1861, capitation tax (Burma), petroleum well revenue, jads and ambar revenue, that named a tax (Burma), receipts from ruby mines (Burma), recoveries, in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C land and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

Entry 8.—As in entry 5, but only ordinary land revenue on fully assessed areas is entered.

Entry 9.—To be entry 8, divided by entry 4 (a).

Entry 10.—To be entry 8, divided by entry 4 (b).

* No details.

† Includes R15,10,020 for Dinajpur for which details are not available.

‡ Includes R15,18,060 for Dinajpur for which details are not available.

APPENDICES

APPENDIX A

The Average Yield per Acre of Principal Crops in India.

A provisional return of the yield per acre of principal crops cultivated in India was first compiled in 1892 from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc. To provide for the periodical revision of the estimates, a system of experimental crop cuttings was prescribed in 1893 by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the last quinquennium ending 1921-22 have been received and scrutinised, and tabulated in the appended tables.* These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (ending 1926-27) in estimating the production of crops for which forecasts are prepared.

2. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made up to the period under review. When, therefore, this average is multiplied by the average area sown, it should give as near an approximation as possible to the outturn of the crop in an average year. The Departments of Agriculture or Land Records of each province maintain standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for several crops in each district. The object of these estimates and to enable the head of the Department in each province to revise his provincial estimates, when necessary. Should it happen that the period has been one of exceptionally favourable or unfavourable conditions which have affected the experiments reported, this would not necessarily involve a change in the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they have been pitched too high or too low.

3. On an examination of the returns for the quinquennium ending 1911-12, it was recognised that the results of the experiments as conducted by the district revenue staff were generally unreliable. A change in the system was therefore considered necessary; and in 1915 the Government of India, with a view to improve the returns, issued instructions to employ as far as possible the expert officers of the provincial Agricultural Department for carrying out experiments on a well-ordered plan in each agricultural tract and for the investigation of average crop outturns in the various provinces. The new system was introduced in the quinquennium ending 1916-17 in some of the provinces mainly as an experimental measure, as explained in the previous report. It appears from the present reports that during the quinquennium under review the new system was not fully carried into effect in most of the provinces. In Bengal, for instance, only cuttings of jute were made by trained officers of the Agricultural Department under expert supervision. In Madras the experiments conducted by the Agricultural Department are too few to admit of the results being accepted as representative. In Bombay the new system of experiments conducted by officers of the Agricultural Department continued, but in certain districts, where the kind and value of the land varies widely from field to field, the old method had to be adopted. In Bihar and Orissa crop tests were carried out by the Agricultural Department on a small scale in thirteen districts. In the Central Provinces and Berar the experiments made are stated to be still of doubtful value. In the Punjab officers of the Agricultural Department were only consulted in revising the standards. In Burma, according to the revised instructions, the work was entrusted to the Settlement Officers of the recommendations of a conference held in 1920 (which were accepted by the Local Government) the work was transferred to the Agricultural Department on the ground that the cuttings made by them supply sufficiently reliable data for ascertaining the actual average outturns of crops. In the North-West Frontier Province, the work was entrusted to the Agricultural Department

* The return for the previous quinquennium ending 1916-17 was published in 1919

APPENDIX A--contd.

in the quinquennium under review; but the system, it is stated, has not proved satisfactory on account of inadequate staff. In Mysore results of crop experiments conducted by the Agricultural Department were utilised for checking and revising those of the Revenue Department.

4. As a result of the experiments conducted or investigations made during the quinquennium under review, considerable changes have been made in the averages previously adopted, except in the United Provinces, Bombay, and the Central Provinces and Berar. In Bengal, the yield of autumn rice has been raised from 871 to 888 lbs, of jute from 1,300 to 1,330 lbs, and of sugarcane from 2,963 to 3,004 lbs. In Madras, the average outturn of sugarcane has been raised from 5,040 to 6,420 lbs, of rice from 1,047 to 1,065 lbs and of cotton from 66 to 78 lbs. In Sind rice has been raised from 1,316 to 1,341 lbs and cotton from 170 to 190 lbs. In the Punjab, the yield of wheat has been raised from 791 to 856 lbs, of gram from 615 to 671 lbs, and of sugarcane from 1,933 to 2,191 lbs. In Assam, the yield of jute has been increased from 1,320 to 1,400 lbs, and of sugarcane from 2,016 to 2,128 lbs. In the North-West Frontier Province, the yield of sugarcane has been raised from 2,660 to 2,721 lbs. On the other hand, the standards have been lowered in certain cases. The yield of winter rice has been decreased from 1,036 to 1,029 lbs in Bengal, from 1,234 to 987 lbs in Bihar and Orissa, and from 952 to 896 lbs in Assam. Autumn rice in Bihar and Orissa has been lowered from 800 to 741 lbs. In Madras jowar has been reduced from 696 to 569 lbs, bajra from 624 to 488 lbs, and ragi from 1,092 to 927 lbs. In the Punjab maize has been lowered from 1,010 to 962 lbs, and jowar from 470 to 434 lbs. Wheat, barley and bajra in the North-West Frontier Province have been put at lower figures, viz. 614 lbs, 880 lbs, and 436 lbs, as against 676 lbs, 907 lbs, and 552 lbs, respectively, in the preceding quinquennium.

5. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special tea returns for the five calendar years ending 1921.

NOTE.—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, and the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.
(2) The superscripted figures of the previous quinquennia have been inserted merely to show the trend of the revision made in each period.
The variations in the figures of yield of crops now reported as compared with previous ones are due to the fact that the averages have been worked out not approximately as before, but accurately.
The average for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17.
(a) As constituted before 1906. (d) Spring. (g) Bengal. (j) Relates to Eastern Bengal and Assam.
(b) As constituted before 1912. (e) Autumn. (h) Chota Nagpur. (k) Berar.

INDIA and in the MYSORE STATE.

(1) The figures of yield of sugarcane crop have not been shown in the present return as no figures had been reported by district officers owing to the fact that it is not a staple crop in Sind.

APPENDIX B.

EXPLANATORY NOTES.

Table I.—Area.

Bengal
(Page 14)

The area cadastrally surveyed up to 1921-22 comprises 29,458,491 acres or about 61·57 per cent of the total area of the province (exclusive of Indian States and the Chittagong Hill Tracts). The figures for the remaining area of the province are based more or less on estimates.

Madras
(Page 14)

Column 2 states the area as ascertained by the Provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain raiyatwari and whole inam villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts. Of the total area (89,683,043 acres) entered in column 6 for 1921-22 (page 14), 67,887,960 acres are based on actual returns and 21,795,083 acres on estimates.

The total area in column 5 includes the unaccounted-for difference in the Ramnad district between the Atlas sheet scale and traverse area on the one hand, and the estimated areas in the village accounts of unsurveyed areas on the other. The difference was about 928,000 acres in 1920-21 and 952,000 acres in 1921-22. The Collector has been asked to account for the increase in the difference.

Bombay
(Page 14)

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department, supplemented in the case of Indian States by the return of the Topographical Survey.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the Revenue Survey Records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,714,166 acres) entered in columns 5 and 6 for 1921-22 (page 14), 44,561,698 acres are based on actual returns and 4,152,468 acres on estimates.

Sind
(Page 14)

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department, supplemented in the case of Indian States by the returns of the Topographical Survey. The revenue survey being incomplete in Sind, the exact area is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the Revenue Survey Records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,149,898 acres) entered in these columns for 1921-22, 30,024,990 acres are based on actual returns and 124,908 acres on estimates.

United Provinces
(Page 15)

Columns 5 and 6.—For tracts which possess no agency for collecting statistics, the figures are based on estimates. Of the total area (52,615,015 acres) entered in column 6 for 1921-22 for the province of Agra, 45,224,015 acres are based on actual returns and 7,391,000 acres on estimates.

Bihar and Orissa
(Page 15)

The area cadastrally surveyed is 50,085,390 acres, which is 94·3 per cent of the total area of the province (exclusive of Indian States). The figures for the remaining area of the province are based more or less on estimates.

Panjab
(Page 15)

Column 6.—Figures for area in river beds in Gujraon not accounted for in the revenue papers and for high mountainous tracts in Simla and Kangra are based more or less on estimates. (See also notes to column 3 in Table II, page 74).

Burma
(Page 15)

From 1921-22 the statistics for Upper and Lower Burma have been combined in one table and are not shown in two parts as was the practice before.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table I.—Area—continued.

Columns 2, 5 and 6—In districts where there has been no professional survey estimates framed in the best manner possible are accepted subject to revision from time to time as survey extends. Burma—contd.
(Page 16)

Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08, Feudatory States in Upper Chindwin and Yamethin which, together with the Northern Shan States, were formerly included in columns 2 and 3 and excluded from columns 5 and 6 are shown from 1921-22, in columns 2, 5 and 6 and excluded from column 3. Putao, the Southern Shan States and Karenni have been included from 1921-22.

The estimated area of Myitkyina has been revised on the basis of surveys still in progress and now for the first time includes the Ilkamti Long area (662,592 acres). Of the total area (155,668,427 acres) for the whole province, 32,417,940 acres are based on actual survey and the balance (123,250,487 acres) on estimates.

Columns 2, 5 and 6—For the unsurveyed areas of zamindari estates and waste land grants for which accurate statistics are not available, the figures are based on estimates. In these provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects. Central Province
(Page 16)

Column 2, states the area as ascertained by the local Survey and Settlement Department. Berar
(Page 16)

Columns 2, 5 and 6—The figures for the unsurveyed areas in Cachar and Sylhet, the permanently settled and *lakkiraj* estates in Goalpara, the Hill Tracts of the Garo Hill district, the Naga Hills, the Lushai Hills, and the Khasi and Jaintia Hills are based on estimates. Assam
(Page 16)

Column 2 states the area as given in the settlement records.

Ajmer-Merwara
(Page 16)

Table II.—Classification of Area.

Column 2—The figures represent Government forests and estimates of other forest areas furnished by district officers. Bengal
(Page 18)

Column 2 includes the area cultivated within forests. The area cultivated with coffee, tea and rubber within forests is, however, excluded from this column and is shown under column 6, since the year 1918-19. Madras
(Page 18)

Column 4 includes areas occupied by *babul* and casuarina trees when they do not form parts of forest areas.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6—Of the total net sown area for 1921-22 (33,041,655 acres) stated in this column, 27,419,824 acres are based on actual returns and 5,621,831 acres on estimates.

Figures for unsurveyed villages are based on estimates.

Column 2 includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions. Bombay
(Page 18)

Column 3 includes all land recorded at the Survey and Settlement as unculturable, although at times a very small quantity of this land is cultivated.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table II.—Classification of Area—continued.

Bombay—contd. (Page 18)	<p><i>Column 5.</i>—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.</p> <p><i>Column 6.</i>—Of the total net sown area (26,862,377 acres) entered in this column for 1921-22, 25,567,941 acres are based on actual returns and 1,294,436 acres on estimates.</p>
Sind (Page 18)	<p><i>Column 2.</i>—The figures do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.</p>
United Provinces (Page 19)	<p><i>Column 2</i> includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the Forest Administration Report which excludes these areas. This column also includes the Siwalik Range in the Dehra Dun District.</p> <p><i>Column 5.</i>—The maximum period for which land left untilled is reckoned as fallow is three years.</p> <p><i>Column 6.</i>—Of the total net sown area (26,604,060 acres) entered in this column for 1921-22 for the province of Agra, 26,000,960 acres are based on actual returns and 604,000 acres on estimates.</p>
Bihar and Orissa (Page 19)	<p><i>Column 2.</i>—The figures represent Government forests and estimates of other forest areas furnished by District Officers.</p>
Punjab (Page 19)	<p><i>Column 2</i> includes all lands specially allotted to forest growth, under the control of Government or any Local Board or Municipality.</p> <p><i>Column 3.</i>—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,896,990 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.</p> <p><i>Column 4</i> includes large areas of Government waste not allotted for cultivation.</p> <p><i>Column 5.</i>—The maximum period for which land is reckoned as fallow is two years; but as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the Province, however, the classification is amended annually.</p>
Burma (Pages 19-20)	<p>For tracts outside the surveyed area the figures are based on estimates.</p> <p><i>Column 2.</i>—The area classed as forests comprises only those areas which are administered by the Forest Department as reserved forests or fuel reserves.</p> <p><i>Column 3.</i>—Land not available for cultivation includes all land absolutely barren and all lands covered by buildings, roads, water or otherwise appropriated to uses other than agriculture. In settled tracts the unculturable area is taken from settlement registers, but in the unsettled tracts it is obtained from the best source available.</p> <p><i>Column 4</i> includes land thrown out of cultivation and abandoned and any land under palms and bamboos and thatching grass which is not shown in columns 2, 3, 5 or 6.</p> <p><i>Column 5</i> includes all land occupied for agricultural purposes which is left uncultivated. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.</p> <p><i>Column 6.</i>—Of the total net area sown (10,019,572 acres) entered in this column for 1921-22 for the whole province, 13,621,978 acres are based on actual returns and 2,391,594 acres on estimates.</p>

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table II.—Classification of Area—continued.

Column 2 shows the areas administered by the Forest Department; but the figures Central Provinces differ from those in the Forest Administration Report, because the actual area of the forest (Page 20) is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thikadai villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Durg, Raipur and Bilaspur districts this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of those sparse and shifting cultivation.

Column 3 states areas covered with water, hill or rock, and land occupied by buildings and roads.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2 includes the forest area administered by the Forest Department, but exclude Berar a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest (Page 20) report.

Column 3 includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 includes land available for cultivation but not given out.

Column 5 includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2.—The figures represent reserved forests, but exclude the areas of forest villages Assam within the reserves which are entered under the appropriate heads of this table. (Page 20)

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated for three years, but which remain in the occupation of leaseholders. Figures for the hill districts except the plains portion of the Garo Hills and Sadiya Frontier Tract are rough estimates.

Column 6.—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya Frontier Tract are based on estimates.

Column 2 includes all lands specially allotted to forest growth under the control of North-West Frontier Government or any Local Board or Municipality, and protected village waste in Hazara Province (Page 20) administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table II.—Classification of Area—concluded.

Column 2.—The forest area relates to khalsa, jagir, and minor istamrar villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

Table III.—Area irrigated and Crops irrigated.

Columns 2 to 19.—Areas irrigated from all sources are only estimates, except in the case of areas irrigated from Government canals.

Column 4.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

Column 7.—Of the total area 9,562,091 acres irrigated in 1921-22, 7,902,706 acres are based on actual returns and 1,659,385 acres on estimates.

Columns 2 to 7.—The figures given for private canals, tanks, wells, and other sources are rough estimates.

Columns 2 to 6.—Government canals include private canals except in Dehra Dun, Naini Tal, Budaun, and Basti for which districts separate figures for private canals are obtained. There are very few private canals in the United Provinces.

Other food crops include condiments and spices, fruits and vegetables and miscellaneous food crops.

Column 7.—Of the total area for the province of Agra (7,469,447 acres) irrigated in 1921-22, 7,433,517 acres are based on actual returns and 35,930 acres on estimates.

Columns 2 to 19.—The figures are only estimates, except in the case of areas irrigated from Government canals.

Columns 8 to 19 state the gross area irrigated, that is, land irrigated in both seasons is counted twice.

Columns 8 to 19 include only crops actually irrigated; for instance, where an unirrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column.

Columns 2 to 19.—Estimates of areas irrigated are available for Kamrup, Darrang, Sibsagar, the Khasi and Jaintia Hills, the Garo Hills, the Lushai Hills and the Sadiya Frontier Tract. In the case of the last four districts, however, the estimates are somewhat incomplete.

Columns 8 to 19 state the gross area irrigated, that is, land irrigated in both seasons is counted twice, but areas irrigated more than once in a single harvest are included only once in columns 2-7.

Table IV.—Area under Crops.

Statistics are not prepared by village or circle officers. The figures entered in this table are estimates. Statistics for jute only are collected through the agency of *panchayats* (village unions).

Column 39 (*fodder crops*) states the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column. It shows crops that in normal times are used only as fodder.

Figures for unsurveyed villages are based on estimates.

The area sown with unimportant mixed crops, for which no separate heading is provided, in the provincial crop statements, is assigned to the principal crop by the village accountant.

United Provinces
(Pages 30-33, 36-39)

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table IV.—Area under Crops—continued.

The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and United Provinces—gram, jowar and arhar, bajra and arhar, and cotton and arhar, for which separate headings ^{could} (Pages 30-33, 36-39) are provided in the crop statements, are distributed in accordance with prescribed formula and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9 and 10.—The whole of the area of the land planted with food grains wheat, barley, etc., mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,767,000 acres in the whole of the United Provinces of Agra and Oudh in 1921-22.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixt with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1921-22 (for the whole of the United Provinces of Agra and Oudh) to 660,000 acres of linseed, 975,000 acres of sesamum, and 2,132,000 acres of rapeseed.

There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal. Estimates have, however, been made for Garhwal and included in the table.

No statistics are at present prepared by village or circle officers, except in the Sambalpur Bihar and Orissa district. The figures for all other districts entered in this table are estimates. The estimates (Pages 32-33, 38-39) for Patna, Gaya, Shahabad, Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently-settled areas), Balasore, Angul, the Santal Parganas, Hazaribagh, Ranchi, Palamanu and Singhbhum are, however, based on the figures collected during the cadastral survey.

For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

The information is received from district officers who in their turn obtain figures from the district Land Records staffs in the case of the temporarily-settled areas and from Zamindars in the case of the permanently-settled portion of Goalpara, with the exception in the latter district of jute, the estimate for which is compiled by the village Chankidari Panchayats. In the permanently-settled part of Sylhet the figures for jute are those submitted after actual inspection by the village Chankidari Panchayats. The figures for tea are reported by the garden managers, while for all other crops estimates have been framed by the district officers from the actual areas in the surveyed parts, applied to the rest of the districts. The figures for the hill districts and the Sadiya Frontier Tract are rough estimates which are revised quinquennially except for cotton for the hill districts and sugarcane and rape and mustard for the Sadiya Frontier Tract for which estimates have to be made annually for the forecasts of these crops.

Column 10.—The area under fruits and vegetables includes village sites.

Table V.—Live-stock.

Figures for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts in columns 2 to 4 have, however, subsequently been revised. The census did not take into account the animals named in columns 9 to 16, nor ploughs and carts (columns 17 and 18). Figures for 1919-20 under all the heads are based on a cattle census taken in 1920.

The last quinquennial census was taken in October, 1919, in all villages, Government Madras Inam, and Zamindari, and stock in cities, cantonments, and that employed in Government Departments and Municipalities were included. Oxen, buffaloes, horses and ponies not old enough for work or breeding were treated as young stock.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table V.—Live-stock—continued.

Bombay and Sind
(Pages 42-43).

The figures are collected once in five years. The last quinquennial census was taken in 1919-20.

United Provinces
(Pages 42-43)

The table is prepared quinquennially on a census in each district taken every five years. The census which was due in 1913-14 but could not be taken in that year owing to famine in some of the districts, was taken in 1914-15 in all the districts except Almora, Garhwal, and the hill tracts of Naini Tal. In these latter districts the census was taken in 1912. The last census was taken in 1920, except in Almora, Garhwal, and the hill tracts of Naini Tal.

Bihar and Orissa
(Pages 42-43).

The figures for 1913-14 shown in the table for all the districts of the Province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live-stock held in these districts towards the end of 1913. For Palamau, Hazaribagh, and Ranchi the figures based on information collected during survey operations, while the figures for Manbhum were based on police reports. Corrections were made in the figures for Hazaribagh in 1915-16 and for Palamau in 1917-18. The figures for 1919-20 were for the most part ascertained by a census held in January 1920. In Manbhum the available settlement figures were supplemented by a census. In Hazaribagh and Ranchi, the previous settlement figures were brought up to date by a census in 1 per cent of the villages. In Palamau, the settlement figures were accepted. The 1919-20 figures were finally corrected in 1922 when a review of the census was published.

Punjab
(Pages 42-43)

A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1920. All cattle in cantonments and Municipalities as also those belonging to Government are included.

Burma
(Pages 42-43)

Annual returns of agricultural stock are prepared by village headmen, revenue surveyors, and *tailthuggis*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

Central Provinces
(Pages 44-45)

The figures are collected annually, between the 1st January and the 15th March, by the patwaris in each village for the areas in their respective charges. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (*e.g.* for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, cantonments, and in forest villages are included.

Berar
(Pages 44-45)

A census is made annually by the village officers. All cattle belonging to one owner are entered against his name even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Assam
(Pages 44-45)

The statistics for 1919-20 are based on a cattle census held in 1920 except in the plains portion of Garo Hills for which the figures are those obtained at a census taken in 1918. No information is available for Garo Hills (hill portions), Naga Hills, Khasi and Jaintia Hills and Lushai Hills.

North-West Frontier
Province
(Pages 44-45)

A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1920. All cattle belonging to Government are included.

Table VI.—Land Revenue.

Bengal
(Pages 46-47)

The table is prepared quinquennially, and the figures were last collected in 1917-18.

(Column 1.—The following classification of estates has been adopted:—

- (1) *Zamindari* (*permanently settled*)-including estates managed for proprietors by Government.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table VI.—Land Revenue—continued.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, Bengal—*contd.* namely, those settled for periods with proprietors and estates leased to farmers (Pages 46-47) for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially. The figures were last collected in 1918-19.

Madras
(Pages 46-47)

Column 3 (a).—In the case of raiyatwari tracts this column states the areas of unoccupied assessed lands, of all unassessed porambokes, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous"; and in the case of zamindari tracts the areas of hills, porambokes, and minor inams are entered. The entire area of whole inam villages is deducted from this column.

Column 3 (b).—Raiyatwari includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—The figures for the raiyatwari tenures in this column represent the total occupied area stated in village papers which differ in some cases from the resultant of preceding columns.

Column 4 (b).—For certain districts areas actually cultivated and for certain other estimates, or actuals supplemented by estimates, are shown in this column.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 6 shows only the "ordinary revenue", as defined in the Civil Accounts, on area fully assessed.

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

This return is prepared quinquennially.

Bombay
(Page, 46-49,

Column 1.—Lands held under special tenures, such as talukari, melwasi, udhad-jama-bandi naryadari, and bhagdari in Gujarat and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)".

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area.

Column 3 (b) includes alienated cultivated and zamindari cultivated (estimated) land.

Column 4 includes land under temporary cultivation, also pot inams paying full assessment.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 2.5 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pot inams and the like scattered areas, which cannot be distinguished from the population of the fully assessed area.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table VI.—Land Revenue—continued.

Bombay—contd.
(Pages 46-49)

Column 12.—The incidence is based on the figures given in column 11 and those in column 8 *plus* the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

Sind
(Pages 48-49)

This return is prepared quinquennially.

Column 3 (a) includes fallows and fully assessed unoccupied area.

Column 4 excludes fallows and fully assessed unoccupied area [see note to column 3].

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years 6·3 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 10.—The incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

North-West Frontier
Province
(Pages 54-55)

Columns 3 (a) and 3 (b) include villages receiving frontier remissions and istamrari tenures.

Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year.

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10.—The incidence is calculated on the cultivated area excluding current fallows.

United Provinces
(Pages 48-49)

The table is prepared quinquennially, and the figures were last collected in 1921-22.

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming.

Column 5 states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed Gorait Jagirs), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tarai, and Bhabar Estates, and receipts from Forest Estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax; (4) miscellaneous, comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent, (c) malikanas or allowance to excluded proprietors, (d) fines and forfeitures of Revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, (i) patwari miscellaneous receipts (Revenue Record Room), (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, (v) Partition fees, (g) Rents of Railway class "C" land and rents of buildings situated on such land. On the average of the last five years about 2·13 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 6.—The total population of the province includes the population of the Benares State.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

Columns 13 and 14.—The figures are taken from the Census Reports of 1911.

The table is prepared quinquennially, and the figures were last collected in 1921-22.

Ajmer-Merwara
(Pages 56-57)

Column 1.—The khalsa area has been classed as "Zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "Zamindari (permanently settled)."

Column 4 includes in the case of the khalsa villages the assessed cultivated area including assessed fallows.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table VI.—Land Revenue—continued.

Column 10.—The cultivated area is in the case of "Zamindari (temporarily settled)," the Ajuer-Merwara—
crop portion of the fully assessed area. contd.
(Pages 56-57)

Column 11 excludes population of Jagir villages.

The table is prepared quinquennially.

Bihar and Orissa
(Pages 48-51)

Column 1.—The following classification of estates has been adopted :—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government;

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0·3 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Columns 3 (a) and 3 (b) include villages receiving frontier remissions, tracts which are Punjab
entirely unassessed (such as the Kulu Mountains) and istamrari tenures. (Pages 50-51)

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10.—The cultivated area taken for calculating the incidence is exclusive of current fallows.

Column 2 includes tracts outside the surveyed area for which the figures are mostly Burma
based on estimates. (Pages 50-51)

Column 3 (a).—No deduction is made for areas held revenue-free or at privileged rates as they are, ordinarily less than an entire village and as it is difficult to estimate the corresponding deductions to be made in the population (Column 11).

Column 3 (b) includes the whole area except that occupied for cultivation.

Column 4 (a) includes the area occupied for cultivation including land wholly or partly exempted or remitted from assessment on account of fallow or short crops.

Column 4 (b) represents the area actually sown whether assessed or exempted or remitted from assessment.

Column 5 comprises ordinary land revenue (including water rate), capitation tax, *thathameda* tax, fishery revenue and miscellaneous revenue (petroleum, rubies, other minerals, etc.). Sums remitted on account of uncultivated land or short crops, etc., are excluded.

Column 6 represents the population at the last census with no allowance for subsequent increase.

Column 8 represents the ordinary land revenue (including water rate) actually collected or due for collection within the year excluding remissions and exemptions.

Column 1.—Zamindari (temporarily settled) includes *malguzari* and *thekadari*.

Central Provinces
(Pages 50-53)

Column 2 states the area by village papers (column 6 of table I; No. 9).

Column 3 (a).—Zamindari estates properly so-called (that is, excluding *malguzari*) are classed as not fully assessed.

Column 4 (b) excludes fallows.

Column 5.—The figures represent different items of land revenue for different districts, no uniform practice having been followed throughout the province.

Column 10.—The cultivated area referred to in this column is the fully assessed portion of the net sown area.

APPENDIX B—concluded.

EXPLANATORY NOTES—concluded.

Table VI.—Land Revenue—concluded.

Belar
(Pages 52-53)

Column 3 (a).—This column states jagir, izara, and palampat villages, all unassessed land forest areas, village sites, roads, rivers, etc.

Column 4 (a).—*Pot Kharab* lands are excluded from this column, which includes only occupied lands available for cultivation.

Column 4 (b) states the cultivated area in khalsa villages only.

Column 5.—The figures include the revenue derived from jagir, palampat, and izara villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items.

Column 8 shows assessment on occupied lands only, as stated in column 4(a).

Column 10.—The incidence has been calculated on the area entered in column 4 (b), that is, the cultivated area in khalsa villages only.

Column 11 excludes population of jagir and izara villages.

Assam
(Pages 51-55)

Column 1.—*Raiyatwari* includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). *Zamindari (temporarily settled)* includes, besides temporarily settled Zamindari estates, fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 1·374 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 10.—The incidence has been calculated on the cultivated portion of the fully assessed area.

Column 11.—The figures of population of fully assessed areas are estimates based upon village census registers.

APPENDIX C VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA

- Agasi, agati, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmod* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's weed."
- Akurkura or javandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment.
- Ampasham* (*spondius magnifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoides*)—The spiked millet.
- Bané* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barlati* (*Figna catjang*)—Asparagus, a food grain.
- Barti* (see Wudalu).
- Bel* (*Ægle Marmelos*)—A fruit.
- Bhagdari* (see Narvadari).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Chenna* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Cotula lachryma-jobi*)—A food grain, "Job's Tear."
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or popat bean.
- Cholam* (see Jowar).
- Cholanathu* (*Andropogon sorghum*)—Fodder jowar.
- Chonli* (see Burbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A soboliferous palm, the leaves of which are used for thatching purposes, also for matting.
- Dhaircha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhutara* (*Datura alba*)—A drug.
- Dinilivi* (*Casalpinia coriara*)—A tanning material.
- Gajar*—Carrot.
- Garmal* (*Colerus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Goruit* (United Provinces)—Village watchman.
- Henna* (*Lawsonia alba*)—A dye.
- Indam* (Madras)—Alienated villages or lands granted rent-free. *Whole indam* villages are entire villages held on such tenure; *minor indams* are portions of villages, generally a number of fields, held on *indam* tenure.
- (Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.
- Isfagul* (*Plantago ovata*)—A drug.
- Islamrari* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned is charged with a permanently fixed quit-rent.
- Izafal* (Bombay)—A form of service tenure.
- Izara* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagir* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jamlo or naval*—Black plum.
- Jamma* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

Jenugulu—Asparagus.

Jinjili (*Sesamum indicum*)—An oilseed.

Jira—Caraway.

Jodi (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

Jowar (*Sorghum vulgare*)—The great millet.

Kalparyu—Kidney bean.

Kangni (*Panicum Italicum*)—Italian millet.

Kamranga (*Averrhoa Carambola*)—A fruit.

Kanda (*Dracontium*)—A vegetable crop.

Kankrol (*Momordica cochinchinensis*)—A vegetable crop.

Karola (*Momordica Charantia*)—A vegetable crop.

Karuvapilai (*Murraya Kornigii*)—A condiment.

Kavali (*Sterculia urens*)—The Indian katura, a fruit.

Kavathu (*Dioscorea alata*)—A tuber used as a food stuff.

Khalsa (Bombay)—Government occupancy or raiyatwari tenure.

—(Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.

—(Berar, Ajmer-Merwara)—Land paying full revenue to Government.

Khatedar (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam)—Land assessed to full revenue.

Khoti (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kirni (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.

Kodo or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.

Korai—The Indian matting sedge.

Kolinji (*Tephrosia purpurea*)—A drug.

Koorka (*Strobilanthes*)—A vegetable crop.

Kuhudi (*Panicum trypheron*)—A food grain.

Kulthi (*Dolichos biflorus*)—Horse gram.

Kutki (see *Kodo*).

Kwin (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.

Lakhiraj (Assam)—Revenue-free land.

Lobia (see *Barbati*).

Madder (*Rubia tinctorum* and *R. cordifolia*)—A dye.

Mahalkari (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.

Makhan sim—The sword bean.

Malguzari (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Mamlatdar (Bombay)—The chief revenue and police officer (native) in charge of a taluk.

Mankachu (*Alocasia indica*)—A root crop.

Marna (*Elusine coracana*)—A kind of millet.

Marukkolundi (*Artemisia vulgaris*)—The Indian worm wood.

Mehwasi (Bombay)—A proprietary tenure assessable to revenue at a lump sum.

Muafi (Manpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.

Mung (*Phaseolus Mungo*)—Green gram.

APPENDIX C—continued VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—continued

- Munsarim* (Berar)—A head native revenue officer.
- Narvadari, Bhagdari* (Bombay)—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump and in the latter distributed by rates over fields.
- Neem or Margosa* (*Melia azadirachta*)—A non-food crop.
- Necrali* (*Gynocordia odorata*)—An oilseed.
- Nela mulaka* (*Solanum xanthocarpum*)—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam)—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Odanula* (*Ochlandra Rheedii*)—A reed.
- Ol or zaminkand*—The elephant foot, a root crop.
- Palampat* (Berar)—Land held on payment of a quit-rent, but not necessarily hereditary.
- Panchayat* (Bengal)—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*)—A fruit.
- Parpatligar* (Coorg)—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg)—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*)—A vegetable crop.
- Peshkash* (Madras)—The fixed land revenue payable to Government on all permanently-settled estates.
- Pimakkottai or pouna*—The mast wood.
- Ponnagantikura* (*Alternanthera sessilis*)—A vegetable crop.
- Poramboke* (Madras)—Lands reserved for public or village communal purposes.
- Poti inams* (Bombay)—Lands sub-alienated in alienated villages.
- Poti khardi* (Berar)—The unculturable area included in a survey number.
- Puliyavara* (*Oralis corniculata*)—A vegetable crop.
- Ragi* (see Marua).
- Randhuni* (see Ajmud).
- Rayaswari*—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Sabai grass* (*Ischaemum Angustifolium*)—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*)—A root crop.
- Sapodilla* (*Achras sapota*)—A fruit.
- Sebastian* (*Cordia Myxa*)—A fruit.
- Shanbóg* (Coorg)—A village accountant appointed by Government.
- Skrottriem* (Madras)—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizia Lebbek*)—A non-food crop.
- Sorrell* (*Rumex vesicarius*)—A vegetable crop.
- Sother*—Radish.
- Swank* (*Panicum frumentaceum*)—A food grain.
- Talukdari* (Bombay)—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*)—A spice.
- Thathameda* (Upper Burma)—Household tax.
- Thattan payara* (see Barbat).
- Thekadar* (Central Provinces)—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thetke grass* (*Imperata arundinacea*)—A small perennial grass used chiefly for thatching purposes.
- Thugyi* (Burma)—A village headman.

APPENDIX C—concluded

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—concluded

- Til* (*Sesamum indicum*).—An oilseed.
- Uchhe* (*Momordica muricata*).—A vegetable crop.
- Udai* (*Acacia eburnea*).—A thorny tree used as fuel or for fencing purposes.
- Udhad-jamabandi* (Bombay).—A proprietary tenure subject to fixed assessment.
- Umbli* (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.
- Unda* (*Pongamia glabra*).—An oilseed.
- Urad* (*Phaseolus radiatus*).—Black gram.
- Wudalu or barti* (*Panicum flavidum*).—A food grain.
- Zamindar*.—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.
- (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.
- Zamindari*.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.
- (United Provinces).—An undivided estate held in joint tenure.
-

APPENDIX D ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION IN TABLE IV

NAME OF CROP		Heds of classification in Table IV
English or Vernacular	Botanical	
Agasi, agati or avati	Sesbania grandiflora	40. Fruits and Vegetables including root crops.
Agave	Agave spp.	25. Fibres—others.
Ajmud or Randhuni	Carum Roxburghianum	20. Condiments and spices.
Ajwan or Bishop's weed	Carum Copticum	20. " " "
Akurkura (see Chrysanthemum)
Al (see Morinda)	Aloe vera	37. Drugs and Narcotics— others.
Aloes
Alya (see Cress)	Curcuma Amada	20. Condiments and spices.
Amada or Mamidi allam	Amarantus	41. Misc. food crops.
Amaranth	Pimpinella Anisum
Ampazham (see Plum)	Feronia elephantum	20. Condiments and spices.
Anise seed	Eugenia Jambos	40. Fruits and Vegetables including root crops
Apple, wood	Anona squamosa and A.	40. " " "
" Rose	reticulata.	40. " " "
" Custard	Areca Catechu	37. Drugs and Narcotics— others.
Areca nut or Betel nut	Cajanus indicus	10. Other food grains, etc.
Arhar or pigeon pea	Bixa Orellana	30. Dyes and Tanning Materials—others.
Arnatto or Arnatto	Maiantha arundinacea	41. Misc. food crops.
Arrowroot, West Indian	Curcuma angustifolia	41. " " "
" Wild or East Indian	Cynara Scolymus or Cen-	40. Fruits and Vegetables including root crops.
Artichoke	tauria Cardunculus.
Arum (edible), Kachu or Kachalu	Colocasia Antiquorum	40. " " "
Arunelli (see Gooseberry, country star)
Bajra (see Millet)	Vigna Catjang	10. Other food grains, etc.
Barbati, Lobia, Jemungulu, Thattan-payara or Chowli	Hordeum vulgare	4. Barley.
(Asparagus)	Ocimum Basilicum	37. Drugs and Narcotics— others.
Barley	Phaseolus lunatus	40. Fruits and Vegetables including root crops.
Barti (see Wudalu)	Canavalia ensiformis, C.	40. Fruits and Vegetables including root crops.
Basil, sweet	gladiata.	40. " " "
Beans	Phaseolus vulgaris	40. " " "
" Asparagus (see Barbati)	Psophocarpus tetragonolobus	40. " " "
" Sword or Makhan Sim	Dolichos lablab	40. " " "
" French	Phaseolus aconitifolius	40. " " "
" Goa	Glycine hispida	40. " " "
" Indian, Chikkudukayalu, or Popat	Beta vulgaris	40. " " "
" Kidney, Moth, or Kalpayaru	Egle Marmelos	40. " " "
" Soy	Piper Betle	37. Drugs and Narcotics— others.
Beetroot
Bel	Averrhoa Bilimbi	40. Fruits and Vegetables including root crops.
Betel vine	Cephalandra indica	40. " " "
" nut (see Arceanut)	Coleus aromaticus	37. Drugs and Narcotics— others.
Bhindi (see Hibiscus, edible)	Solanum Melongena, S.	40. Fruits and Vegetables including root crops.
Bilimbi	longum.	37. Drugs and Narcotics— others.
Bimb	Solanum xanthocarpum
Bishop's weed (see Ajwan)
Borage, country
Brinjal
" bogoda or neta mulaka
Buck wheat (see Wheat)

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Cabbage	<i>Brassica oleracea</i>	40. Fruits and Vegetables including root crops.
Caraway or Jira	<i>Carum Carui</i>	20. Condiments and spices.
„ Black or Shahjira	<i>Carum Bulbocastanum</i>	20. „ „ „
Cardamom Aromatic	<i>Amomum aromaticum</i>	20. „ „ „
„ greater	„ <i>subulatum</i>	20. „ „ „
„ lesser	<i>Elettaria Cardamomum</i>	20. „ „ „
Carob or Locust tree	<i>Ceratonia Siliqua</i>	30. Fodder crops.
Carrot or Gajar	<i>Daucus Carota</i>	40. Fruits and Vegetables including root crops.
Cashew nut	<i>Anacardium occidentale</i>	40. „ „ „
Cassava	<i>Manihot utilisima</i> and <i>M. palmata</i> .	40. „ „ „
Castor	<i>Ricinus communis</i>	17. Castor.
Cauliflower	<i>Brassica oleracea</i>	40. Fruits and Vegetables including root crops.
Celery	<i>Apium graveolens</i>	40. „ „ „
Chaplash (<i>see</i> Sam tree)
Chayroot	<i>Oldenlandia umbellata</i>	30. Dyes and Tanning Materials—others.
Cheena (<i>see</i> Millet)
Cheik (<i>see</i> Job's Tear)
Chicory	<i>Cichorium Intybus</i>	40. Fruits and Vegetables including root crops.
Chickling Vetch (<i>see</i> Vetch)
Chillies	<i>Capsicum sp.</i>	20. Condiments and spices.
Chikkudukayalu (<i>see</i> Beans, Indian)
Cholum (<i>see</i> Millet)
Cholanathu (fodder Cholum)	<i>Andropogon Sorghum</i>	39. Fodder crops.
Chowli (<i>see</i> Barbat)
Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum coronarium</i> .	42. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i>	35. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i>	20. Condiments and spices.
Citron or lime or lemon	<i>Citrus medica</i>	40. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus</i> .	20. Condiments and spices.
Coconut	<i>Cocos nucifera</i>	16. Coconut.
Coffee	<i>Coffea arabica</i>	32. Coffee.
Coriander	<i>Coriandrum sativum</i>	20. Condiments and spices.
Cotton	<i>Gossypium sp.</i>	23. Cotton.
Cress	<i>Lepidium sativum</i>	40. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus</i>	40. „ „ „
Cumbu (<i>see</i> Millet)
Cumin	<i>Cuminum Cyminum</i>	20. Condiments and spices.
Custard Apple (<i>see</i> Apple)
Dani	<i>Nipa fruticans</i>	42. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)
Dhaincha	<i>Sesbania aculeata</i>	42. Miscellaneous non-food crops.
Dhatūra	<i>Datura alba</i>	37. Drugs and Narcotics— others.
Dill or Sowa	<i>Peucedanum graveolens</i>	18. Oilseeds—others.
Dividivi	<i>Cesalpinia coriara</i>	30. Dyes and Tanning Materials—others.
Drumsticks or Horse-radish	<i>Moringa pterygosperma</i>	40. Fruits and Vegetables including root crops.
Elephant foot, Zamirkand or Ol	<i>Amorphophallus campanulatus</i> .	40. „ „ „
Elephant yam	<i>Tryphonium trilobatum</i>	40. „ „ „
Fennel	<i>Foeniculum vulgare</i>	20. Condiments and spices.

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Pomegranate	<i>Punica granatum</i>	40. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i>	40. " " "
Ponnagantikura	<i>Alternanthera sessilis</i>	40. " " "
Potato	<i>Solanum tuberosum</i>	40. " " "
" Sweet	<i>Ipomoea Batatas, Batatas edulis.</i>	40. " " "
Pudina (see Mint)
Puliyavara	<i>Oxalis corniculata</i>	40. Fruits and Vegetables including root crops.
Pumpkin	<i>Cucurbita pepo</i>	10. " " "
Pumpkin Melon (see Gourd red)	<i>Raphanus sativus</i>	40. Fruits and Vegetables including root crops.
Radish or Sother
Ragi (see Millet)	<i>Brassica sp.</i>	14. Rape and Mustard.
Randhuni (see Ajmud)	<i>Rubus lasiocarpus</i>	40. Fruits and Vegetables including root crops.
Rapeseed	<i>Boehmeria nivea</i>	25. Fibres—others.
Raspberry	<i>Oryza sativa</i>	2. Rice.
Rhea	<i>Hibiscus subdariffa</i>	40. Fruits and Vegetables including root crops.
Rice	<i>Hevea brasiliensis, manihot Glaziovii.</i>	42. Miscellaneous non-food crops.
Rose apple (see Apple)	<i>Ischœmum angustifolium</i>	25. Fibres—others.
Roselle	<i>Carthamus tinctorius</i>	30. Dyes and Tanning Materials—others.
Rubber (India)	<i>Crocus sativus</i>	30. " " "
Sabai grass	<i>Salvia officinalis</i>	20. Condiments and spices.
Safflower	<i>Artocarpus Chaplasha</i>	42. Miscellaneous non-food crops.
Saffron	<i>Pachyrhizus angulatus</i>	40. Fruits and Vegetables including root crops.
Sage	<i>Achras Sapota</i>	40. " " "
Sam tree or Chaplash	<i>Cordia myxa</i>	40. Fruits and Vegetables including root crops.
Sank-alu	<i>Cassia angustifolia and C. ovata.</i>	37. Drugs and Narcotics— others.
Sapodilla	<i>Sesamum indicum</i>	13. Sesamum.
Sawan (see Swank)
Sebestan	<i>Trapa bispinosa</i>	40. Fruits and Vegetables including root crops.
Senna	<i>Albizzia Lebbek</i>	42. Miscellaneous non-food crops.
Sesamum, til or jinjili	<i>Sapindus trifoliatus</i>	37. Drugs and Narcotics— others.
Shahjira (see Caraway, black)	<i>Rumex vesicarius</i>	40. Fruits and Vegetables including root crops.
Shama (see Swank)
Singhara or water caltrop
Siris tree or vagai	<i>Spinacea oleracea</i>	40. Fruits and Vegetables including root crops.
Sisal hemp (see Hemp)	<i>Basella alba</i>	40. " " "
Soapnut or Kumkudu-Kaya	<i>Atroplex hortensis</i>	40. " " "
Sorguja (see Niger seed)	<i>Fragaria vesca</i>	40. " " "
Sorrell	<i>Saccharum officinarum</i>	21. Sugarcane.
Sowa (see Dill)
Sother (see Radish)
Soy bean (see Bean)
Spelt wheat (see Wheat)
Spinach
" Indian or poi
" Mountain, or Garden Orache
Strawberry
Sugarcane

APPENDIX D—concluded.

ALPHABETICAL LIST OF CROPS—concluded.

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Sunflower	<i>Helianthus Annuus</i>	18. Oilseeds—others.
Swallow-wort	<i>Calotropis</i> sp	25. Fibres—others.
Swank, Sawan, or Shumna	<i>Panicum frumentaceum</i>	10. Other food grains, etc.
Sweet flag	<i>Acorus Calamus</i>	37. Drugs and Narcotics— others.
Sweet potato (<i>see</i> Potato)
Tamarind	<i>Tamarindus indica</i>	20. Condiments and spices.
„ Manila	<i>Pithecolobium dulce</i>	40. Fruits and Vegetables including root crops.
Taramira	<i>Ernea sativa</i>	14. Rape and Mustard.
Tea	<i>Camelia Thea</i>	33. Tea.
Tejpat	<i>Cinnamomum Tamala</i> and <i>C. obtusifolium</i> .	20. Condiments and spices.
Tepari (<i>see</i> Gooseberry)
Thattun-payara (<i>see</i> Barbati)
Thetkê (grass)	<i>Imperata arundinacea</i>	42. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)
Tobacco	<i>Nicotiana Tabacum</i> and <i>N.</i> <i>Rustica</i> .	34. Tobacco.
Tomato	<i>Lycopersicum esculentum</i>	40. Fruits and Vegetables including root crops.
Tori, Toria	<i>Brassica Napus</i>	14. Rape and Mustard.
Turmeric	<i>Curcuma longa</i>	20. Condiments and spices.
Turnip	<i>Brassica Rapa</i>	40. Fruits and Vegetables including root crops.
Uchhe	<i>Momordica muricata</i>	10. „ „ „
Udai	<i>Acacia eburnea</i>	42. Miscellaneous non-food crops.
Unda	<i>Pongamia glabra</i>	18. Oilseeds—others.
Urad (<i>see</i> Gram)
Varagu (<i>see</i> Millet)
Vagai (<i>see</i> Siris tree)
Vempali (<i>see</i> Kolinji)
Vetch, Field or gawar	<i>Cyamopsis psoralioides</i>	39. Fodder crops.
„ Chickling or khesari	<i>Lathyrus sativus</i>	10. Other food grains, etc.
Water caltrop (<i>see</i> Singhara)
„ melon (<i>see</i> Melon)
Wheat	<i>Triticum sativum</i>	3. Wheat.
„ Buck	<i>Pagopyrum esculentum</i>	10. Other food grains, etc.
„ Spelt	<i>Triticum sativum</i> var <i>Spelta</i> .	3. Wheat.
Wood apple (<i>see</i> Apple)
Wudalu or barti	<i>Panicum flavidum</i>	10. Other food grains, etc.
Yams „	<i>Dioscorea</i> sp.	40. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)
